EVIDENCE OF HARM

MERCURY IN VACCINES
AND THE AUTISM EPIDEMIC:
A MEDICAL CONTROVERSY

"[A] gripping investigation. Much like the
9/11 commission's report, it is
an alarming page-turner."

Evidence of Harm: Mercury in Vaccines and the Autism Epidemic: A Medical Controversy

[continue reading](#)

In the 1990s reported autism cases among American children began spiking, from about 1 in 10,000 in 1987 to a shocking 1 in 166 today. Most of these photos contained a little-known preservative known as thimerosal, which includes a quantity of the toxin mercury. This craze coincided by adding several new photos to the nation's already crowded vaccination schedule, grouped together and given soon after birth or in the first months of infancy. Evidence of Harm explores the heated controversy over what many parents, physicians, public officials, and educators have called an "epidemic" of afflicted kids. Following several family members, David Kirby traces their struggle to understand how and why their once-healthy kids quickly descended into silence or disturbed behavior, frequently accompanied by severe physical illness. An important and troubling book, Evidence of Harm reveals both open public and unsung obstacles faced by desperate families who've been opposed by the mixed power of the government, health firms, and pharmaceutical giants. In the end, as research is beginning to demonstrate, the queries raised by these households have got significant implications for all kids, and for those entrusted to oversee our nationwide health. Alarmed by the levels of mercury in the vaccine plan, these family members sought answers from their doctors, from technology, from pharmaceutical companies that produce vaccines, and finally from the Center for Disease Control and the meals and Medication Administration-to no get. From closed meetings of the FDA, CDC, and drug businesses, to the mystical rider inserted in to the 2002 Homeland Security Bill that could bar thimerosal litigation, to open hearings held by Congress, this book displays a medical establishment established to deny "evidence of harm" that might be linked to thimerosal and mercury in vaccines. But because they dug deeper, the households also found powerful allies in Congress and in the tiny community of doctors and researchers who think that the rise of autism and various other disorders is linked to toxic degrees of mercury that accumulate in the systems of some kids.

Putting Profit Before Patients: Man's Inhumanity Against Mankind Evidence of Harm is a factual, critical, meticulous and extremely thorough investigation of the machinations, greed, collusion, inhumane works, corruption, cover ups, hidden agendas, obfuscation of specifics, dread mongering, deceit, with keeping of info regarding the harmful and toxic undesired ramifications of vaccinations and the questionable efficacy and basic safety of vaccinations by the FDA and the CDC. Their pecuniary/vested and conflict of interests in their relationships with BigPharma is puerile, insidious and clearly a matter of putting `Profit Before Patients. It is painfully obvious that the FDA and CDC are areas filled with egos of titanic proportions. Warning about Vaccines Excellent research and right on target exposing the extension of unneeded vaccines. It is obvious that their hearts aren't in it for the public interest and well being.' The torture of orthodox allopathic medicine that the FDA and CDC provides inflicted upon the globe population is usually reprehensible and unjustified when there are more humane alternative allopathic malignancy treatments that provide a pain free, quality and dignity of a standard life through the entire treatment process. Given their actions in the issues of Alan Yurko and Gabrielle Swank the FDA and CDC have already been complicit in a travesty of Natural and Sociable Justice and cruelty to humanity and should encounter the Judicial effects of their actions. What of the `Revolving Door Syndrome' where officers of the FDA and CDC can resign from the respective agencies one day, go to work for BigPharma the next time and subsequently lobby for the Fast Monitoring and Grandfather clause approval of new drugs. Discharge ALL INGREDIENTS OF EACH SINGLE VACCINE. He also displays the way the CDC and various other government companies schemed to hide the data which proves a direct link between thimerosal and autism. Imagine if it had been they who were put through the same persecution and purgatory with that they have hunted down Dr Stanislaw Burzynski? Eye Opening A definite possibility to the autism epidemic that is taking over the USA. STOP THE MADNESS. Their main focus is on the careers, working towards their fame, glory, fortune and reputation. Behind the Scenes Look at the Vaccine-Autism Controversy An excellent behind-the-scenes chronicle of the vaccine-autism controversy. I would've preferred just a little much less about the people and much more about the technical elements of the debate, but this publication does cover important aspects of both. A Must Read for the Parents of an Autistic Kid. Well done! It displays the duplicity of the NIH and why they are not to be trusted..... their grandparents, doctors, Congressmen, and anyone whom believes that the existing autism epidemic is a result of the medical catastrophe relating to the use of a known neurotoxin in the mandated vaccines given to children in this country... COMPARE THE HEALTH OF THE UNVACCINATED JUST LIKE THE AMISH VS THE UNVACCINATED EVERY SINGLE FAMILY AFFECTED BY VACCINE INJURY SHOULD Go through THIS BOOK. How insidious is usually this! David selflessly place his career at risk in writing this reserve and for that the autism community is usually forever indebted to him. FOR EXAMPLE, COMPARE THE FITNESS OF THE UNVACCINATED JUST LIKE THE AMISH VS THE UNVACCINATED. This book gives a detailed analysis of the role of mercury/thimerisol in Autism and describes the initiatives of several parents and researchers to bring this to light, while coming up against obstructionist actions from government agencies like the CDC. The reserve is well balanced and poses both sides of the debate, and includes 1st hands accounts of meetings, phone calls, and e mails, and also graphs and tables of relevent scientific data. If you're likely to read this publication, read a publication that takes the additional stance aswell to provide you a full view of the issue such as "The Panic Virus" by Seth Mnookin. If you have a family member who's Autistic and so are suspicious that mercury/thimerisol could be implicated, then you have to read this book. Awesone just like a mystery novel I purchased this because i have a child with autism and i felt like i wanted more

answers. It's an ideal example of how library assets are not always credible. It traces the task of parents who started to unravel the connection themselves and shaped the group Safe Minds to deal with this. So glad I came across this book in library shelves So glad I found this book about library shelves. Essential read. I do need to state though I nearly got angry reading it. The reality in this matter is shocking if you open your eyes! DOCTORS, SCIENTISTS, RESEARCHERS, PHARMACEUTICAL INDUSTRY, CDC, NIH, LEGISLATURE, Cosmetic surgeon GENERAL, AND THE PRESIDENT OF THE UNITED STATES.! What if they were exposed to the same terrifying and horrific process with which they have treated Dr Stanislaw Burzynski's patients and the ones searching for his treatment? DO THE STUDY THAT PARENTS HAVE BEEN BEGGING FOR. Great Book If you want to learn where the notion of mercury, vaccinations, and autism came from, here is among the sources. It really is excellently written and David Kirby really delves in.. If you give cash to Autism Speaks you are helping high salaries and fancy Manhattan offices but if you support Safe Thoughts, Adventures in Autism and other sincere groups, you'll be doing real great. Begin by reading this book. Misinformation and bad science The contents of the book are pure crap, misinformation, and also have been thoroughly debunked by actual science. Just Tells One Side of the Story While supposedly unbiased, this reserve really just gives merit to and explores evidence to one part of the debate. Significantly, don't waste your money upon this anti-vax garbage. Additionally there is quite a bit of information relating to the feasible biological mechanisms and their involvement with Autism. Certainly worth your time and effort if you are ready to open . I will utilize it in details literacy instruction and ask students to contrast it with an increase of recent scholarly articles on the topic.. Certainly worth your time if you are prepared to open your mind to the catastrophe of vaccines in our future generations.. Imagine if some of the \$47 trillion spent on the 'War on Cancers' to date had been allocated to prevention and the choice allopathic treatment protocols? IT also traces the stories of parents who are fighting for what they find out happened to their children and all of the corruption out there. I got a few of them answered with this reserve!. Five Stars Thank you Worse, leaking mercury is usually bio-accumulative I actually am a former CEO 1 World Trade Middle, strategist to new technologies including biotech having developed and directed strategy including a couple of the giants such as for example BIOGEN which produces Copaxone, an MS medication that suppresses the immune system. I fired two globe renown MN Treatment centers that diagnosed me with MS, came back their wheelchair, underwent oral revision per IAOMT mercury-free dental methods to eliminate my toxic mercury--amalgam ain't silver, kids, a fraud since 1800s--but my dentist Dr Gary Jacobson was summarily stripped of his permit by an uninformed robotic MN Lawyer General Hubert Humphrey III "Skip" who blindly obeyed a non-scientific MN Dental Board that MANDATES ONLY MERCURY (ADA mother or father owned the patent, forced all dental schools to buy this poison or risk any accreditation so they complied). Mercury (Hg) may be the most deadly neurotoxin in the globe as toxicologists know, expect for radioactive elements) and the ADA offers forced all dentists to make sure it must be placed in our mouths, a centimeter from our brains, which we have now know-- thanks to study opposed by ADA-- leaks into all of our organs 24/7. David does an awesome work of outlining how our federal government, or must I say PHARMA's federal government, was bought and payed for by the amount of money generated from income which harmed a generation of America's children (my son included). Work well don David Kirby continue the good fight! Regrettably and sadly they have obviously demonstrated that they do not have got an empathic, humane and compassionate bone in their respective bodies The FDA and CDC are in breach and contravention of the Nuremberg Code, Content 19 'The To Understand' and the Commission on the Privileges of the kid. THE NAME

CALLING. THE LIES. MAKE ALL Study PUBLIC. No one bats an eyelid! If you're going to get a baby you should go through this and then decide if you would like to vaccinate just how they currently have the schedule, which I truly believe must be changed. Comprehensive analysis of the Thimerisol/Mercury controversy Evidence of Harm is an excellent book that filled a very large void. COMPARE VARIOUS VACCINE SC
