Great textbook. Explains with a far more scientific-approach to nursing concepts Offers been a very helpful textbook for me personally as someone who once was a biology major before I went into nursing. Although I have only really thoroughly covered the first 10 chapters, I currently appreciate its approach to using even more scientific terminology for laying the foundation of each chapter's concepts. It's similar to anatomy and physiology. Five Stars superb information- use for fresh or skilled nurse in critical care Okay textbook That is an ok book. Offers really opened my eye to concepts of discomfort control, sedation, and understanding the patient's perspective on the ICU stay. Not really impressed. Dense but a great resource Some of my classmates said this text message was a little bit over their heads, and they're probably ideal, but I came across this to be a rich reference and served as an excellent book for my critical treatment course in my ADN program. Three Stars Nice One Star Publication was correct, but came broken in half along the spine One Star I payed \$90 for a book that was basically torn in two. Doesnt Concentrate on nursing implications. I adored it so very much I turned around and bought it. I still use this book often. It is easy to read and understand, however thoroughly extensive and comprehensive. Its a school reserve. I desire I started my initial semester with this publication. It will definitely stay with me for the others of my career. This was the best book for all of nursing school. extremely detailed and on her game. Very good for what it really is. Great foundations textbook for ICU nursing ideas. Lists many helpful article references in each chapter and seems to have very few editing errors unlike other nursing textbooks I've read through. I loved it thus much We turned around and bought it I rented this book in Amazon for a course. They are scattered throughout the reading. Good for review. School Needed for school Five Stars I love this author; Fulfilled a class requirement. Used it regularly as my main text resource and earned among the 4 A's in the class! Thanks!
