Why go under the knife or get shots when you're able to wear makeup? Most of the time I don't trust makeup books because the probability that Photo-shop had occurred and special lightening. Not. In all honesty, makeup looks as good as the structure where it's placed. This book gives excellent advice on how to use makeup to cover up facial flaws and maximize your appearance. This publication gives a very in depth on for you to make use of a moisturizer, find the appropriate color in your concealer, what exactly are great inexpensive brands, home cures, and description on various kinds of makeup (foundations, powders, lip balms, lipstick, lip gloss, mascara, concealers, highlighters, and blush). How-to instructions are obvious and understandable, and the before and after photos delight and inspire. I really liked this book. However, for every technique presented, I could not make the dark hollows under my sleepy eye disappear. After all, that's what the whole book is focused on. Powdered face constitute smells fishy. I was a little bit surprised that it had been sent to me in that condition. I Like It, however the (the Realness of the) Photos are Questionable This makeup book supply the power of illusion, but I rather see these makeup techniques in person without any possible of Photo shop or special lightening that enhances the looks of the make-up technique. I didn't like the way the dark lip lined look on the ladies at all in this publication. Not so well done I REALLY LIKE this book I Love this publication . I asked the chance of photo shop. Anyone considering cosmetic surgery should go through this book first. The models are true-to-life, not paid for from a company. The women in the book epidermis looked much too perfect. I noticed women who covered their Arcus Deformity with make-up but I still noticed the puffiness despite their attempts to cover it up. This is one of the reasons; I want an authentic lightening and find visuals or photos are practical representations of the makeup appearance. I don't trust how the YouTube`s makeup gurus because they use special lightening to create their marks or under eye bags less noticeable. hand bags are totally gone without the puffiness or the crease within the attention in this publication. Their faces looked organic and I under no circumstances met a female who makeup looks totally natural even it's the "No makeup look".*Get Gone Dark Circles and Lift the Eyes*Larger, More Defined Eye*A More Defined Eyelid Crease*Accentuate the Eyes to Downplay Various other Features*Remove Dark Circles Over & This book is great for begginers and i guess also for experienced people. This woman is a genius Eve Pearl does AMAZING things with people's flaws. Despite the fact that she uses virtually the same for everybody, she does an amazing work with flaws. The cover experienced what were coffee and food spots onto it. Unlike other makeup books, Eve Pearl works together with real people, not professional versions or hollywood close friends: it's real people like you and me who don't possess flawless skin or perfect eyes or noses. I am a subscriber of Eve Pearl's youtube channel and you can see her in action, everything on this book involves life as she will it...
