Vintage updated for our modern times The book provides been thoroughly updated with references to new research and current events woven into it. It offers chapters on Dark racial identity development in childhood, adolescence, and adulthood, that i have found extremely insightful and practical. I highly recommend this book to anyone thinking about racism and racial justice. If you interact with kids in ANY way (parent, family member, social worker, teacher, coach, babysitter, nanny, pastor, etc. Another component that I found very useful is the debate of Affirmative Action and some arguments against it that are generally brought up. We've quite a distance to go when it comes to race relations in this nation. Overall, this is a classic and a highly recommended read for anyone interested in issues of cultural justice, equal chance, democracy, and the psychological underpinnings of prejudice. I'd recommend this to anyone but specifically to anyone who needs a primer on racism from an educational perspective. To have someone who had verified it had been all the more enlightening. I would recommend it for use in classrooms, and also among groups of adults eager to find out more about race in America.. A fantastic resource. The first 35 pages only blew my brain. It reduces race in ways that's intellectually honest and available. An excellent resource. Essential read. Learned a whole lot Good Read The book was an extremely interesting read. I take advantage of this with my learners and they always get a lot from it... I discovered SO much! Tatum earns examples from increasing her very own sons and tidbits of the conversations she experienced with them, modeling parent-child interactions around race for parents who could be faced with similar problems.), I HIGHLY recommend you read this reserve. I learned so much from this book. offering me new information, and confirming some stuff I'd been observing in society. Love the updates to the powerful book Outstanding resource. Like the updates to the powerful book! Interesting read I must say i enjoyed this reserve. I reads fast for me personally and really allows you to think about what has and what has not changed in all these years. The publication arrived extremely fast. I would strongly recommend. Dr. I'm glad I did I ordered this edition when they older one went out of publication. I'm pleased I did so. This edition brings the competition discussion to the 21st hundred years to address current issues. Should be required reading The work of Dr. Tatum should be required reading for every teacher and student alike. I have reread it again in recent years, as our political environment shifts and my work in public justice progresses. Must browse for educators! Just wow. It not merely discusses race/identity of young dark people, but it also delves in to the identities of Whites, Latins, Middle Eastern/North Africans, Asians, Native (American) Indians, Asian Indians, biracial kids, and transracial adopted kids (a family group of adopting a child of a different race). That section helped me articulate my own position better and be more prepared for times when such conversations occur spontaneously with students or colleagues. I believe this is essential go through for all educators and counselors of any color. Five Stars No issues Highly recommended for anybody who interacts with children. I read this publication decades ago, as a young sociologist. I came across it to be extremely enlightening, well written therefore extremely impactful.. There is no excuse for ignorance of racial identification development when such an amazing resource is obtainable. Thorough discussion of current racial systems and injustices. Very Thought Provoking I ordered this reserve for a Competition/Gender Grad class. When I first found this reserve, I didn't know what to expect. Although many of the items I had guessed. I use this with my learners and . The book enunciates the climate in your society today. We mainly because black People in america need recognize what is going on around us and take a stand.
