Notes To Stephanie: Middle Aged Love Letters And Life Stories This book reminds me a little bit of the days when I would gaze at the sky and wonder about life. Incidentally, being a guy, I never really thought I would sit and examine something like this. Although the facts are not discussed, the letters inform you that the (mainly) grown children were not thrilled by the relationship between their parents. Through the entire collection there are encouraging observations on lifestyle and family members, observing both the ups and downs. Each of us has our own unique strand of beads that we choose to use as our life experiences. Like life, it isn't all hearts and flowers as there are occasions of stress and "fussing" as the writer calls the friction heading on at times in the family associations. The beginning notes are filled up with the upbeat enthusiasm of newly infatuated love. This of course creates a way to obtain tension and sadness. Also job stresses, holiday stresses and resulting tensions are commented on. He highlights that beads are all different sizes and quality; Seldom do we actually write to the types we love anymore. The book involves a rather unexpected end and I was sorry to close it. This author made me actually want to compose something to my lover and best friend. Now here is the rub. What perform I write about? Well, I can just spin through this publication and re-read one of is own letters and let his subject matter inspire me to write about something very similar or allow what I just read to get me
