With the same extraordinary skill that he used to demystify scientific abstraction and the new physics, Gary Zukay, the award-winning writer of *The Dancing Wu Li Masters*, here takes us on a brilliant and penetrating exploration of the brand new phase of evolution we have now entered. Using his scientist's vision and philosopher's heart, Zukau displays how infusing the activities of lifestyle with reverence, compassion, and trust makes them come alive with indicating and purpose. He shows the way the pursuit of exterior power has created our survival-of-the-fittest understanding of development, generated conflict between lovers, communities, and superpowers, and brought us to the edge of destruction. With lucidity and style, Zukau explains that people are evolving from a species that pursues power based upon the perceptions of the five senses -- external power -- into a species that pursues authentic power -- power that's based on the perceptions and ideals of the spirit. *The Chair of the Soul* describes the remarkable journey to the spirit that each of us is certainly on. He illustrates how the emerging ideals of the spirit are changing marriages into spiritual partnerships, psychology into spiritual psychology, and transforming our daily lives.

Among the best books I have EVER read (and I read alot) Bought this book 25 years back, and it changed my lifestyle at that time. Bought 5 extra copies for friends to provide away I was so impressed. When I recognized how precious this is, I slowed up. Learning from your errors and changing behavior is certainly where this notion should end. Life moves south, divorce at 50, change of lifestyle immediately, and lost looking for a path back again. Read this book once again to gain stability and accept the circumstances I was dealt. There are therefore many amazing concepts I'd highly recommend scanning this reserve. Met a couple people who were thinking about the book so I bought them each this book. It seems when you grow older you have time to explore your soul problems. Then the worst time of my life strike me at 67---my son died in a vehicle accident. Was completely devastated for three months, looking for just about any reason to hang in there."I wasn't able to relate with everything Gary Zukau discusses in this publication. It's a constant journey book. Today the people I acquired bought this book for 20 some years ago have read it and explained they wished that they had examine it years back. So do yourself an excellent service and purchase this book. Wow. Purpose is everything. I've now bought most of Zukau's books and all are wonderful and insightful. After reading the book, I tried to make more responsible choices and take into account the consequences of my choices by asking: do I really want what this choice will produce? Most Influential Book! I am now buying more of this book for gifts again. The Seat of the Soul, may be the first spirituality book I read and it fundamentally changed just how I view everything. I am open minded, but am particularly troubled when I come across writers who, instead of state things as "as i see it", or "in my view", or "what I really believe is normally.. still, the message is an extremely positive one), Michael Singer, Tosha Silver, Peace Pilgrim, Eckhart Tolle. it is tough to articulate. The lessons I came across among its web pages inspired me to go on a personal journey to become the very best edition of myself by living a more fulfilled conscious life full of intention. This is a book like no other This is a book like no other. Here's a few of the best lessons from the reserve: "Forgiveness implies that you don't hold others in charge of your encounters. She mentions it in every her interviews. Refreshing and inspirational Loved it , an excellent pay attention in audio book ."Every action, thought, and feeling is motivated by an purpose, and that intention is a cause that exists as you with an impact. If we participate in the cause, it is not possible for us not to participate in the effect. In the most profound method, we are held accountable for our every action, believed and feeling, which is to state, for our every intention."I related to the concept that each energy I discharge ultimately comes back to me and also have witnessed this play out a huge selection of times in my own life. But at the end of the day, for me, that is troubling material. Very insightful. Like many previous review writers, I quit on this publication when I came to the Dolphin chapter: dolphins are dying because they're exhausted and have decided collectively through their group awareness to abandon the Earth. Am I looking for a particular response? Lots of healers cite to it as being a foundation piece. Read this one first. Am I prepared to accept all of the consequences of this choice? The book is broken into the following chapters: Evolution, Karma, Reverence, Cardiovascular, Intuition, Light, Intention, Choice, Addiction, Relationships, Souls, Psychology, Illusion, Power and Trust! It really is the use of your will. Interesting ideas but difficult to understand We really wanted to like this publication." "The Universe backs the component of you that is of clearest intention." "Temptation is a dress rehearsal for a karmic connection with negativity. I needed to move with him. The concept that my soul is part of a huge mother ship was a bit too much for me to grasp or understand, so the parts I didn't like I ignored. Great book. Life goes on even more. My advice would be to read it with an open up brain, take what you need and leave the rest. Respect those who seek the Truth, doubt those who find it. Read this ASAP I began reading so fast, I couldn't put it down. Most have Wonderful awesome read Life Changing This is so well crafted. I tried to reduce complaining and started requesting myself inquisitive questions such as: What is my intention with posting this?.", instead tell us *exactly* how items are. That is relayed as fact.---it could save your life and help you realize why "stuff" happens inside our lives we can't seem to grasp. I first read

it in 1998 when I was nineteen and it ignited something inside me that was so profound. I consider myself to be "on the road", and gained very little from this article writer. It helped me understand issues my intuition was informing me but I didn't know how I understood.. This certainty is disturbing, particularly when claiming to learn what dolphins believe, or the many planes of angel presence, etc. I wanted to like this because Oprah works with this guy so highly. Sometimes I have found myself not wanting to accept the fact that I've indeed created a specific outcome but when I examined my motives and my intentions I usually found my component and therefore the truth of a specific situation.. There are several other authors out there who relay their own sense of spirituality from a more nuanced and less managing perspective. I especially like Lama Surya Das, Thich Nhat Hanh, Marianne Williamson (although another person who knows just how it is. If you feel you'll like this, YOU LIKE IT! Will help in your spiritual trip.. Many negative factors are taught to youthful unknowing people, it takes time to figure it out. If they are insistent and say "this is actually the way it is", then most likely they are simply requesting to buy to their version of reality, which is usually unlikely to be fact at all. I'm so glad I finally go through it and I'm looking towards reading even more of his books. It sparked my thirst for even more knowledge. It clarifies things I've never heard of so it requires a long time to learn. Feels as though a reference reserve you go back and forth. There's a report and exercise guide by the end of the reserve for each chapter. After reading this book, I questioned my motivation and intention of everything I did and viewed my behavior in a fresh way. It really is true that whenever the student is ready, the teacher can look. One day I appeared through the bookshelf, pulled out this book for the 3rd period, and it helped save my life, despite the fact that I still grieve. Oprah lives and dies by this book. The most enduring lesson I received out of this book is that my intention creates my reality and that I could manifest anything in my life through mindful intention. It changed her existence and it's really changing my thought process about a large amount of things in lifestyle. Sometimes I go to open the reserve and stop myself. Life changing!!! I decided to revisit this publication after having read it years ago. This time around it had more meaning. It's as if Zukav was talking with who I am today and the higher self I am evolving to end up being. I'm loving it, but it's taking me quite a while. Author is a traitor to awareness. After reading the chapter on Karma, I threw the book in the trash. I hardly ever accepted the watch of karma the idea keeps you perpetually in a state of incorrect doing keeping you permanently trapped in earth prison. Life goes on raising family members and working, but tried to incorporate the things I learned in this reserve in tack. I come across that the main thing to ask oneself if whether a writer is requesting to take what they say and judge it on its merits, and then to include it, or not, into your view of spirituality. Like religion it retains you in bondage and gives others power over you. Author is certainly a traitor to awareness. I always understood that my thoughts had been powerful, but everything seemed to click inside me when I examine Gary Zukav's explanation on what purpose creates karmic energy that ultimately comes back.. Flowed very easily and leaves you seeking more. Respect those who seek the Truth, doubt those who think it is..!" "An intention isn't just a desire.. Most didn't read it then when I'd inquire. Gave myself more time to procedure what I was reading. I would recommend it to everyone who's thinking about going deeper. I understood I'd need to reread this, usually. I'm so grateful I found this, so grateful. It feels so familiar and comfortable. Like I was remembering something I currently knew but acquired forgotten.. Instead, I thought we would concentrate on the lessons that spoke if you ask me and I dismissed the others which is my philosophy for just about any nonfiction book. Very insightful.. Gary is great at putting all this into words." "Just by feeling compassion for yourself is it possible to feel compassion for others. What do I hope to escape this? But, I came across the chapters to end up being choppy and many ideas shared (as though they were facts) without context. Very inspiring. Must read. And after reading half of the publication, I didn't learn how to apply the ideas. Excellent and very thoughtful. Truly insightful.
