Paint by Sticker is a compelling new activity for crafters and performers, doodlers and coloring publication enthusiasts of most ages. The works are the Birth of Venus, by Sandro Botticelli, The Creation of Adam, by Michelangelo, Mona Lisa, by Leonardo da Vinci, Gal with a Pearl Earring, by Johannes Vermeer, Napoleon at Saint-Bernard Pass, by Jacques-Louis David, The Great Wave off Kanagawa, by Katsushika Hokusai, Houses of Parliament, Sunlight Effect, by Claude Monet, Still Existence with Apples and a Pot of Primroses, by Paul Cezanne, Dance at Bougival, by Pierre-Auguste Renoir, Bedroom in Arles, by Vincent van Gogh, Breezing Up (A Fair Wind), by Winslow Homer, and the beautiful study in color, Flaming June, by Frederic Leighton. the stickers, the templates, the intuitive directions. The cardstock webpages are perforated for easy removal, making it easy to body the completed pictures. -Color by Sticker Masterpieces includes all you need to create twelve lively, full-color "Masterpieces encourages everyone to channel their internal da Vinci and create twelve iconic works of art. paintings"

Your own masterpieces The size of this book, the quantity of details, artwork, and perforated pages are excellent! Additionally, there are some tips in leading of the book to help you on the way. Takes concentration and a reliable hand. Manufacturing flaws in this edition. A few of the stickers are a bit little (Yep, I'm looking at you?, Breezing Up - Winslow Homer?) but the end item is well worth it. On another artwork piece, I pointed out that a few stickers aren't fully slice on some of the sticker web pages which causes just a little snafu when trying to pick them up. Great Way To Relax The book came very quickly as I ordered it one night and it came the very next day.! It could be a good addition if either of those were incorporated with the book. I am so extremely disappointed by the grade of this book. Plus, you hardly notice once the final product is complete. You could super very easily tear a hole in your stickers with those! I intend to laminate a few of my best pieces and hang them. I came across a dangerous new hobby. Actually, I simply ordered my fourth one (it's paint by sticker: birds). This is relaxing, not really messy, and in the end you feel as if you created art! Addictive new hobby! Super fun -- great outcomes! It's supposed to look like a mosaic puzzle ultimately, and that's the wonder of it. Make use of tweezers to greatly help positioning and sticking of the stickers, especially the small ones. The best, super creative idea I've seen in a long, long time, for kids. It helps with precision if you are a perfectionist such as for example myself. Super fun for "kids" of most ages! These sticker by quantity books have become fun! Some of the stickers are slightly smaller than their form or are a hair too large and overlap but I believe it gives the pictures some extra character. 14 really enjoy them and so do I! Beautiful colors and detail. As a grown-up, I loved the vibrant colours and recognizable artworks, but I worried it could be too complete for tiny fingers. Great gift idea I bought this for my 5-year-previous nephew, and it was very well-received. I'd recommend this as a great creative outlet! It turned out to be just great, though. The child involved gets in a whole lot of LEGO period, and does not have any trouble manipulating small things. If your child still struggles with that, though, you may consider among the simpler paint-by-sticker titles. Definitely held them entertained! I love these books as they are an easy way to be innovative on the go as you do not have to bring other components besides the book. Great gift for the artwork lover I love coloring however the whole mature coloring books were really of zero interest if you ask me. When I noticed that they today make color by sticker books I really was thinking about trying one out. I have a art history background so when I noticed this book I bought it instantly. I've found myself getting lost in doing the works of art. Just not the activity for me. The price is such a great deal through Amazon. It's great that the picture and corresponding sticker pages can be torn out of the book, therefore everyone can be working on their very own picture

simultaneously. My son really needed it and got. That is a great item for those with endurance and idle hands! I've literally shed hours (not to mention working neck muscles) focusing on these. Another awesome book I really like these books I function graveyard and use these to stay awake I simply finished this publication and these were just some of the pictures I think turned out best they all prearranged perfectly and the stickers were trim where these were easy to eliminate from the the sticker page no lifting on the pictures while putting it together Hours of fun Great for older kids. Had a blast carrying out this with my friends. I highly recommend using a pair of tweezers.PS – you absolutely need to involve some tweezers on hands whenever you want to do this. My girls, age range 11 & I bought the last one and I adored it, this time they need to have gotten a different manufacturer. So addicting! I love it! JUST USE TWEEZERS WITH IT I actually SUPER enjoy these, and it's wayyyy easier on my joints than coloring and knitting and than basically all the other hobbies I've had over the years. I dig it, which was my third of the books that I own! It's addictive! I am hoping this review helps! It makes it very much easy to understand where your stickers are going without your fingers getting in the way. You "can" use your hands instead, but it's quite literally impossible to accomplish it well without them. You don't want anything fancy, except I significantly recommend either the type with the flat, right edge at a 90 degree position or the flat right ones at just like a 45 level angle. Basically, NOT the types with the pointed suggestion. The pictures have become nice, but the stickers aren't cut correctly on several of the bedding (don't always totally fill the form) - or not cut thoroughly - so they tear in a way they didn't with the first book. Great for Long Flights! I purchased this for a 14-hour flight for my 9-year-old and it was so worth it! I also purchased one (with different styles) for my 13-year-old plus they both loved them! I know people that cherished these books. There are several made simply for kids. Also, they are mess-free, so you won't need to worry about cleaning up. Another reviewer pointed out using tweezers with these, but we were great without them. Not for me! I even framed among my favorite and put it through to my desk at the job. In one of the ideas, it mentioned using either a toothpick or tweezers to help you place the stickers.Also, the publication mentions that the stickers are sticky, which makes you think that they can't be moved once placed on the page, this is not the case unless you have the strength of Thor while pressing the stickers down.Overall, this is a really fun idea and it makes an excellent, cheap gift. Super fun for the meticulous child! It's engaging but you can also concentrate on conversations, and the results are gorgeous! S/he must like putting little itty-bitty stickers on accurately and have a long attention span. For those who have among those children, definitely consider using a! It's better quality than some of the other sticker publication bc the stickers do not fall off after you stick them on and

the stickers are cut well. Great! Simply Great! Ideally, there'll be more of these 'Masterpiece' books in the future!! In fact, I take advantage of tweezers the whole time. I really hope they come out with more artwork masterpiece books since I am nearly done with this one. I am just unhappy that I cannot use it as a Xmas gift now. I see many folks commenting about how the sticker pieces aren't cut away perfectly. It's amazing to see these pictures type as you place actually the littlest of stickers. It really is super fun for the meticulous kid. It's fun to do and easy. Of all things they taken to perform on the plane, these books were by far their favorite! Perhaps in case you are very much pickier about the results you might like to do this. I'll stick to coloring!
