Harnessing the proven benefits of active learning strategies, this is actually the first activity book designed for a broad spectrum of training in aging-related higher education. It features 32 classroom and community-based educational activities for instructors wanting to introduce or improve aging content within their courses. It includes clear, step-by-step methods for applying each activity, including preparation, launch, the activity itself, debate/reflection, wrap-up or follow-up if suitable, and assessment. The book also addresses learning outcomes and includes recommendations for number of individuals, settings, materials, and period required. Underscoring the interdisciplinary nature of aging studies, the publication encompasses teaching strategies for instructors in such disciplines as guidance, family studies, gerontology, geriatrics, medication, psychology, public administration, public health, nursing, social function, sociology, speech pathology, and others. This peer-reviewed collection of hands-on activities is designed by noted educators in aging and incorporates Association for Gerontology in Higher Education (AGHE) competencies. In addition to the book's worth to students, its actions are also good for professionals instructing or taking part in personnel trainings, in-providers, and continuing education. Encompassing important, impactful issues affecting old individuals, the written text examines ageism and ageing in the mass media, dementia, demography, healthcare, housing, physical aging, policy and politics of ageing, positive interactions with older adults, and spirituality. Key Features: Contains 32 experiential learning activities for students in a great selection of aging-related disciplines Designed for activities in the classroom, locally, online, and take-home Provides clear, step-by-step procedures for every activity from implementation through assessment Addresses student learning outcomes and carries a glossary Incorporates AGHE competencies Provides worksheets and forms to end up being downloaded for printing or electronic completion

Superb source for hands-on activities I especially like this this book provides detailed information in each activity. It really is an excellent resource for programs that consist of experiential and assistance learning activities. This consists of a "how exactly to" for students, info and rubrics on grading/evaluating students' work, and the length of time each project is likely to take.
