

A close-up photograph of a woman's face, focusing on her eyes and nose. The image is overlaid with numerous chemical names and ingredients in various colors (red, black, white) and sizes, creating a collage effect. The text is most prominent around the eyes and nose, with some words like 'SODIUM', 'CHLORIDE', 'GLYCERINE', and 'UREA' appearing in larger, bolder fonts. The overall effect suggests a connection between beauty products and chemistry.

Lead in lipstick? 1,4 dioxane in baby soap? As doors slammed within their faces and the wonder myth peeled aside, the industry's Basic. How is this possible? The \$35 billion cosmetics industry is so powerful they's largest cosmetics businesses to ask some rough questions: Why do companies market themselves as pink ribbon leaders in the fight against breast cancer, yet make use of hormone-disrupting and carcinogenic chemicals that may donate to that extremely disease? s toxic secrets begun to emerge. ve kept themselves unregulated for many years. Why do products utilized by men and women of childbearing age contain chemical substances linked to birth defects and infertility? Coal tar in hair shampoo? Not really a Pretty Encounter chronicles the quest that led several health and environmental activists to the world' This scathing investigation peels aside less-than-wonderful layers to expose a business in dire want of an extreme makeover. The good thing is that as the major multinational companies fight for his or her to use hazardous chemicals, business owners are developing safer non-toxic systems and building businesses on the ideals of wellness, justice and personal empowerment.

I learned a whole lot about the reason why and ways that ... I learned a lot about the reasons and ways that the clean cosmetics alliance is fighting to help make the cosmetics sector enhance their labels..Still, the publication has its issue. This publication sparked my curiosity in clean beauty and learning more about the products I use. It was preaching to the choir for me personally, but it still helped to broaden my understanding of what to prevent and why, and to deepen my caution towards industrial beauty products. The FDA will not. The attempt to be chatty and informal falls flat, and held me from acquiring the reportage very seriously. I am on the author's side, and appreciate the place that muckracking and biased issue journalism can possess, but coupled with the cutesy tone I found it unconvincing in its un-objectivity. EASILY was a skeptic of the fees against the cosmetics market, I would remain so after reading this book. Though for people who are first engaging in this issue of toxic PCPs, it is a bit of a harder read.! I'll mortgage it out to close friends who are on the fence about going all-natural, but would not recommend it for skeptics. "Not Just a Pretty Face" is a remarkable read and readers priceless as well as perhaps even existence saving information regarding common, toxic and even lethal items found correct in their make-up luggage.! We really need an independent firm to monitor cosmetics. Not as a reactionary "go all organic" consumer but being able to make reasonable choices about products that function for her and feasible alternatives that are less risky/carcinogenic.! Keep yourself well-informed with this reserve and then take your understanding and lessen your exposure. I actually thought it was an extremely great and informative book We thought it was a really great and informative publication. Interesting facts on the subject of the personal care and beauty industry.! If you're worried about what could be lurking in your cosmetics and skincare, this book can be an absolute must browse!! It's detailed, beneficial, and a huge eyesight opener!This book attempts to become a Food, Inc of the beauty industry, and while it is not quite, it nonetheless is an excellent start at calling attention to the dangers of commercial cosmetics. . Stunning- you NEED to learn this! It reads more like a screed than an expose, and will become rather rambling on the initial person anecdotes while amateur in its presentation of broader issues. Therefore, I would suggest keeping a dictionary close and perhaps doing a bit of research on the topic before hand. I recommend "Not Only a Pretty Encounter" in the Learn More section of "Chapter 6: ...and Trash the Rest: Detoxing for Longevity" in my new reserve, I do nothing like the cosmetics industry. In her book, "Not Just a Quite Face," Stacy Malkan delves deep into the cosmetic industry and discovers many toxic secrets.With that said, let me try and offer a constructive review.This is a book that proposes to expose the seedy underside of the cosmetics industry. It is very readable and "user-friendly". I go through it from cover to cover in just a few days and atlanta divorce attorneys chapter discovered/was repulsed by something brand-new. a lot of information on chemicals and the wonder market that I wasn't alert to, like what is allowed and what isn't and how aesthetic companies have different ingredients for the same product but in other countries, based on what they enable. However, be aware that this is simply not an unbiased perspective. The author has a definite perspective (which I eventually agree with) but nonetheless increase some interesting and important issues that are worth further factor beyond the "preaching to the choir" audience. It is a well crafted, entertaining read and encourages you to pause and believe a moment without having to be overly preachy. Anyone worried for their health or their children's health should read this book..We highly recommend this book. A must browse!. My wife is now regularly visiting the database the writer and the affiliated business has set up and made self informed choices about makeup, sunscreens and other cosmetics. It's about a lot more than just make-up Eye opening Some typos but overall very informative. Good expose, but instead ham-fisted "Not really a Pretty Face" can be an informative and readable expose of the dangerous elements used by the business cosmetics industry in the US, and how the sector has resisted calls

to make their items safer.. a whole lot of info on chemicals and . I really like this book!. Great book! Provided my biases I do encourage readers to check out the provided sources to determine for themselves the veracity of the info (I did therefore and was convinced). So other countries have a higher greener clean quality after that in america, kinda sad. But extremely informative I changed my beauty product purchases to become cleaner and better for my pores and skin and health! "Not Just a Pretty Face, " Stacy Malkan delves deep in to the . Great book!. I really do nothing like the petroleum sector and I certainly don't like the advertising industry. Interesting facts about the personal care and attention and beauty industry. Five Stars area of the United Methodist Women reading list this season excellent layperson's overview First i want to put my biases in advance.
