I like the way the book goes into detail about the facial skin ... as an esthetician I look for this book very useful being that makeup isn't my strongest point. My daughter is an aspiring makeup artist, I purchased this for her. This book is simple to read and packed with lots of tips and advice. Fantastic book! This reserve includes a wealth of information, not just a froufrou makeup information, this is for the severe artist... The corrective make-up chapter is great. When guess what happens is protected in the reserve you can after that go and become creative.. A reserve all MA should examine. This is simply not a beauty guru book showing colorful pictures but a reserve for serious make-up artist or for folks like me who have to pay more focus on detail on every single person's face and take into account their face form I think it is that detail that makes an excellent makeup artist. I've so many make-up books and I hate when we get a new one that just covers the same old things over once again, this is a pleasant shock. I love the level of depth this switches into about completely everything involved with makeup. My daughter can be an aspiring makeup artist, I bought ..Very good investment for the budding make-up artist or for a person curious about proper make-up techniques. I like how the book goes into detail about the face and how he breaks the facial skin down point by point and working with different shapes. This book is simple to read and packed with plenty of tips and . certainly wasn't thinking about purchasing a textbook style makeup publication. Don't want to invest years in makeup school, and just want to understand for freelance, this reserve is the BOOK! Five Stars good Four Stars Very old version but in great condition Very basic, school text message book quality I was extremely disappointed in this reserve, not at all what we was expecting. I graduated from Cosmetology school so a long time ago & Great techniques in this book Great techniques in this book.. A wonderful book teaching all you need to know on the subject of being a makeup artist. Way too many MA simply do what is trending, not what is suitable for the customer's features and structure. A course in a publication all Makeup performers should read.. Face and skin analysis, factors that if you would like to truly be considered a good MA you shouldn't know. would be ideal for somebody current in college. I love it. I have to say that the book outlines the measures for sanitization very well. Great book, EZ way to learn Old book large amount of info every MU artist will need to have ,Ad ,Video and film might want to know biz part,
