Best book I've ever browse concerning social issues with kids I've been functioning as a Para-educator for autistic kids for 24 months and been looking for a book such as this for awhile. Excellent content and intensely useful to construct a systematic program . The Social Abilities Checklist is a mess.I honestly regret buying the kindle version, better add a couple of \$ and buy the paperback. It's years outdated and I still utilize it as a reference. Best publication ever to greatly help find activities that help everyone Best book ever to greatly help find activities that help everyone, but especially those children with sensory issues. Addresses a variety, going method beyond the "five" senses.I assume it really is my fault, as I will have checked how it looked, but I bought other kindle version books and never had an issue.However the Kindle version is super bad. This is really a hands-on manual that instead of just having tips it includes a plan. I really like the appendix that has the worksheet and visual aid ideas. Teachers love it as it is easy to use and the strategies are easy to implement. The publication is well written, readable and has great ideas for actions. The checklist is very helpful in identifying what areas need function and the Module System really helps me to move step-by-step in teaching social abilities. Over all a great publication, but acquired I known how it could have appeared on my kindle, I would've bought the paperback. ok its an ok reserve, but I liked crafting connections and teaching kids with autism to mind-read better.. Here are many examples which can be use in training Teachers love it as it is easy to use and the .. This book offers practical approaches for school settings. Social Skills Solution is quite helpful Public Skills Solutions is a must have for any parent who is teaching their child the valuable sociable skills. It targets common cultural deficits that are pervasive in the classroom placing. It also provides an assessment tool to create baselines and monitor improvement.
