The WHYS & READ THIS BOOK and send it to friends. Jeffrey M Smith is a compelling writer on the risks of GMO food. This publication and video package changed my life. I have so much more knowledge & We must become educated about GMO foods and support State's efforts to obtain GMO or non-GMO labeling placed on all food stuffs sold at food markets. They are hidden inside our everyday lives. Consuming organic/nonGMO is what keeps my children healthy. Extremely well documented. Wonderfully done in a manner that was possible for the . The movies and audio are excellent for posting with others. The DVD's are awesome. This reserve reveals the inside tale and the cover-ups that the meals industry and the federal government don't desire us to know. It will cause you to mad and also determined to do this to stop this assault on the country's health and well-becoming. What Monsanto and other mega-food corps are doing to our food source and our health is completely criminal. The DVD about the adjustments in college student behavior at senior high school once the cafeteria changed the meals to natural, wholesome foods was astounding. Jeffrey can be an incredible professional on all things GMO and is a respected advocate. insight as to WHY GMO foods are dangerous. What is happening to your food is a national tragedy that needs to be stopped today. Must reading if thinking about GMO/GE foods and what Monsanto is doing to us.. I in fact fulfilled him, and he's an excellent guy. Wonderfully done in a fashion that was easy for the lay man to understand. I am passing this to everyone I know to watch. Excellent in all respects. Educate your friends and relations, Information about our foods Fortunately, some years back, we shifted to purchasing almost NO processed foods. Thank heavens.If necessary, we browse the fine print ingredient list on any packaged foods. We avoid packaged foods made up of additives. But "Seeds" notes that the problem will not have to be outlined! Well presented and apparent!!!!The video, Foods, Inc., and the set of Seeds of Deception present intensely useful commentary on the subject of our USA food source and its own management. Nice book. HOWS of staying away from GMO foods. A must read. Just think of the tremendous changes in both behavior and educational achievement that may be occurring across this nation if schools would just change their GMO meals to all natural, organic foods.. Four Stars Good information. The book is can't-put-it-down engaging, though in a fairly horrifying way, given the problems it addresses. A lot more important now that Oregon dropped our bid to require GMO labeling by about 3000 votes. Great GMO education All of this details is excellent.! Even with my existing understanding of genetically modified foods, including schooling with Smith himself, I discovered a whole lot from the publication and from the videos. Jeffrey Smith really knows his stuff. I actually sent out a bunch a few years ago as Xmas gifts, and still send this book to individuals who are clueless about GMOs. Jeffrey Smith has done a great support to the American general public by writing this publication. A great reality check. Should be required reading for all grocery managers and farmers. I purchased 4 copies and approved them out to friends. Five Stars Excellent! The film is certainly informative . I purchased to talk about with others to start out the debate in my neighborhood about GMO's . I also showed additional informational movies. I've all his books and video clips and consider them a really good device in explaining GMOs. extremely informative and written about an even that anyone can ... extremely informative and written in an even that anyone may understand. In case you are the least interested in the food you eat you will want to read this book. Five Stars Very enlightening. Three Stars Came in good shape.It is scary. informative This is one among the DVD's I have purchased on this issue and shared it with friends. GREAT PRODUCT GREAT PRODUCT Five Stars A must go through for every true American.
