

BEYOND A PEANUT

Is this safe?

These flashcards are designed to educate individuals living with PEANUT and TREE NUT allergies, and those persons caring for them.

The Food Allergy Initiative is pleased to help support Mind Flight in the production of "Beyond a Peanut" food allergy flashcards.

Beyond A Peanut - Meals Allergy Awareness Flashcards teach children and those who provide care for them how to remain safe with peanut and tree nut allergies. The flashcards expose cross contamination, the need for label reading and often carrying emergency medication. The cards have multi-colored eye catching info on leading for children and comprehensive safety info on the back. Beyond a Peanut - Food Allergy Recognition Cards incorporates comprehensive basic safety details, and delivers it in an easy to learn format. These cards train children, their extended families, friends, coaches, camp councilors , academic institutions, and childcare suppliers on the principles necessary to provide a protected climate. While many of the flashcards are specific to nut allergy symptoms, they have which can raise the awareness and understanding of all food allergies.

Great practical tips My toddler was identified as having a peanut allergy several months ago. Not long ago i purchased 3 items -- these flashcards, The Peanut Allergy Solution Reserve, and the toddler publication "Mommy is this safe to eat?" The 3 complimented one another, and each acts a different purpose in case you have a peanut allergic kid. These flashcards are great because caregivers can quickly review them to understand risks for your son or daughter. After reading a great deal of information regarding peanut allergies in the last 8 weeks since my daughter was identified as having a severe peanut allergy, these cards do the nicest job of highlighting the most important "basics" out right now there for others to quickly read and comprehend. After flipping through the cards for ten minutes everything she had been talking to me about for days gone by year started making more sense. But I actually learned some things from it, and I believed I knew most everything. Nice educational booklet This is a nice booklet. I actually thought this was very helpful. I recommend these cards. I'd highly recommend this if you know someone or have a kid with an allergy. Great simple reference! Each cards identifies one area/subject (such as for example bakery items, the ballpark, airplanes, the playground) describes the risk (if any), and gives practical guidelines for managing the risk. We would possess conversations about her struggles when it came to leaving her kid at college, with babysitters or even with family. So, for a quick review or even to educate others, these cards are ideal! I wish these were a bit cheaper, but my place is going to school in the morning for a instructor who just doesn't seem to understand the life-threatening nature of a severe allergy and it is my hope that these "simple" cards will make the difference! Now I have an improved understanding of the peanut allergy My co-worker has a kid with a life-threatening peanut allergy. In the end, beyond the parents of an allergic child, many people are not going to take the same timeframe and care to read "everything" out there on the impacts of a peanut allergy and those implications. She shared these flashcards with me and it had been a genuine eye opener. Although I have done a lot of reading since my son's analysis, these cards brought things to my attention I hadn't thought of, like the threat of my birdfeeder. I could go through a few flashcards with my kids while they are taking in snacks. They highlight places you might not think to discover peanuts. I would recommend these cards to anyone who around a child with these allergies. Keep your allergic child safe These great flashcards help to make it easy to understand about caring for a kid with a peanut allergy. The fun illustrations and format are perfect for teaching children at home or at college. For instance, I would do not have considered buying bulk food a danger however now I know that it's for those with peanut allergy symptoms. The flashcards are also ideal for caregivers, grandparents, and neighbors. I will have a much higher knowledge of why vigilance is essential to keep her kid safe. Using these can totally help keep our allergic kids safer. Very Great Tool. I had purchased it to instruct my kids about my daughter's serious peanut allergy. I've purchased one for our house, the grandparents' house and am thinking about buying a couple copies for my daughter's school (one for the classroom and one for the school nurse).
