Corey, a fourth-grader, explains how his color insufficiency caused problems in kindergarten. On the way Corey learns about the particular way he sees colors. Endorsed by the nation's leading color vision experts. Find out about tests for CVD too. Corey's story is followed by a simple description of CVD--what it really is, how many people have it, how they got it, the kind of problems it might cause and suggestions about how to deal with CVD at home, at college and anywhere you go. It provides nothing to do with how smart he's and he doesn't let it get in his method. MOM'S CHOICE AWARD, Next Generation Indie Book Award, National Indie Excellence Reserve Award. His color misunderstandings is a physical condition that lots of people share.

Recommend - must read for parents and teachers So happy a friend recommended this publication for our family. Our almost-kindergartener was diagnosed with colorblindness and reading this book collectively has helped him know how he sees in different ways, and has helped my husband and I as well. Suggest this to anyone who is trying to describe to teachers or other children about getting color blind. Great book for explaining to classmates what color blindness is . We've been asked by our son's friends families to borrow the reserve because their kids want to learn more about what our child sees if they find out he's colorblind.. Great book for explaining to classmates what color blindness is indeed that they know very well what a color blind person sees. Good explanation for adults aswell if they don't already have an understanding of how color blindness adjustments what that person can see. Will be purchasing another for his kindergarten instructor! Fabulous resource to describe Colour Vision Deficiency to kids and ... Readable and easy to understand - actually explained color blindness. Actually produced the classroom teachers in our school cognizant of the colour of the tools they used in combination with their learners with CVD." I was introduced to Karen and her great book and also have been lending it out to parents and children. Very informational, my color deficient son adored for me to read this book to him when we first discovered. And the illustrations have become helpful as well.. This meets & I highly recommend this reserve to any family trying to navigate the globe for their colorblind child. All about color blindness for kids and family This was an excellent book for kids and the entire family. Fabulous resource to describe Colour Vision Deficiency to kids and caregivers of children with color blindness. Great resource I purchased this book mainly because a reference for my son's college, as he is color blind and I needed others to understand how he sees the world, basically. So, now I just purchased another copy to contribute to our child's school library. exceeds our objectives. In fact, I am ordering another duplicate for our personal reference later on as well. Five Stars Very hood explanations and tips. my color deficient child loved for me to read this reserve to him when . Highly recommend to all families with CB kids & Great to provide to teachers. I gave this book to my kids pre-k instructor. My twins are both colorblind and this book helps clarify it to both children and adults. Will most likely buy a duplicate of it to provide to all or any their teachers in the future! schools as an excellent reference... It is a great book, with easy to understand explanations for all age groups. Great book for College Nurse's office As a college nurse working with small children, I am often the first, during eyesight screenings to recognize a kid with color deficiency. Parents and teachers are usually surprised and "things start to make sense. Very Helpful and Informative I purchased this book about 2 yrs ago to help our son understand his colorblindness (he's now 8 years older), and for all of us to learn more as well. The response offers been fantastic. Families have become grateful for this well written, informative book for both kids and adults. It creates an excellent addition to the school nurse's officel
