"I've go through countless books because the mid-sixties and nothing at all has been equal to this reserve. This will give you the power to produce a long lasting transformation like never before, and to have the joy, peace, and true fulfillment you've always been searching for. Far from offering basic platitudes and general principles, Reality Unveiled immerses you into this astonishing world of historic and modern knowledge—and presents you with all the incredible evidence to support it. After offering a uniquely fresh understanding of life and exploring the answers to your innermost queries, it gently continues on to show you how to utilize this inspiring wisdom in your practical, everyday life." —Lex Allen, Author of the Eloah Trilogy  
In Fact Unveiled, Ziad Masri takes you on a profound journey into the heart of existence, revealing a breathtaking, hidden reality that may transform your daily life forever.

Fitting life encounters and years of learning right into a context that makes sense to me. In my own 40's I dropped my dear wife who was my dearest treasure since I was 16. Although I pieced all this collectively myself from everything I've read, it's fine to see it all together. As Masri describes, we are like computers that may only process handfuls of energetic info. I became indifferent to anything positive or negative occurring with me because I feel like I passed away with her. Developing up in a devout Christian family members and likely to Catholic schools throughout childhood my family believed my faith might save me, but it did not. I usually needed more than simply faith because I am as well analytical and have to understand how everything works. I have to understand why and yearning to just understand consumes me until I can make sense of everything. This book doesn't eliminate my grief nonetheless it has helped me come around to the believable possibility that she is not lost forever to me. The publication gives evidence that is tangible and has opened my brain to trusting that because I can't observe something doesn't mean it isn't there. As it happens I really do have faith and this book gives it to me in the manner my mind can understand it in a way that offers been the most meaningful of any publication I have read before. We was 22 years old and I never idea anything like that would happen to me. Five years ago, We was a hardcore atheist. I had a decent knowledge of psychics, biology, and chemistry. There few other mistakes in his book as well, many of which were refuted. BUT an individual question usually lingered in my mind: How do our cells and each section of the cell "understand how to proceed? I give this book one additional star for correctly interpreting quantum mechanics and also explaining the oneness of issues and how exactly we are all interconnected. It is easy to read, understandable yet full of substance. I usually resorted to consciousness as the explanation, each cell will need to have some type of intelligence or conscious awareness. I especially loved his critique of positive thinking and regulations of Attraction. I was 22 years older and I hardly ever thought anything like this would happen to me. Very inspiring publication to say minimal." But I didn't feel correct asking that nor do I feel I was being listened to. What really pushed me personally over the edge into the metaphysical world was when my lover still left me personally. I was beyond devastated, inconsolable. I don't know why but in some way I found myself calling psychic after psychic, requesting them if he'd come back. I started reading books about how exactly psychics worked, and far to my surprise, the energy stuff produced sense intuitively. These books pointed out other metaphysical principles and I shortly immersed myself in all things metaphysical. Today, 5 years later, I have transformed completely seeing that person. It is so much not the same as the majority of the Law of Attraction teaching. Excellent book! To those individuals that question how it could all be accurate, it is true because everything in the entire Universe is merely energy. Research and spirituality go hand in hand. Einstein knew it, Tesla understood it, and so many others did and perform. What I wish to say to scientists and atheists alike, and anyone wondering about the existence of God, I really do believe that whatever God is, it really is real and we are a part of this God but this God is not the one most of the world thinks about. Thank you Masri for writing this book, which is a perfect culmination of everything I've thought about for the last couple of years.. My wanting to know the meaning and truth behind everything, desperate for my place and purpose in life, and trying to make feeling of the division in society was unveiled in this publication. She meant everything if you ask me and I really like her so much. People, usually do not close yourself off if you think that if it's not measurable or provable by research it cannot be accurate. We are so limited in our capability to understand or to see everything around us. Since her passing I have not really cared about my very own life. Great within the reality we think we reside in and the after existence. The practical applications he offers are icing on the cake! I must say I enjoyed it.

For a long time I've wondered; From Abrahams, Eckhart Tolle, Caroline Myss to books about recent lives etc ive browse therefore many books.Why carry out I feel a sense of disconnection from myself and others?, at least for all those rare souls who take it seriously. Masri has taken it all collectively in this creation and offers helped answer a lot of those questions for me. Too much misinformation I wish I possibly could have given this book more celebrities, but it presents logical fallacies and pseudoscience.Will there be a deeper purpose to my entire life? In the event that you resonate with the following questions then that is a must go through.What's this emptiness I feel inside?AM I GOING TO ever be happy?Will generally there ever end up being peace in this crazy globe? Mr.What really happens after I die?What's the idea of everything?As an Engineer I'm heavy on science but not so much spirituality.Are we alone in the universe?.I can't even begin to fathom how much time of analysis went into this book as he has shared an immense amount of knowledge, evidence, and wisdom with us. I am hoping that by scanning this, many people can finally start to understand the real nature of our truth and empower themselves because that's what it's actually about.Well done! Buy this book you wont regret it Ive never wrote a review before but i am 80% through this book and personally i think the urge to do so.Ive read numerous books on spirituality. not anymore! Now, do not get me incorrect, I am not really arguing and only scientific empiricism. I really believe that books discover you rather than the other way around. So if you ended up here please purchase this book, there's grounds why you ended it up here at the 1st place.I wouldn't recommend this publication to anyone who's not used to spirituality because i think its quite advanced knowledge yet very easy to comprehend & read. And in addition because nobody is ready for the truth, we are in different levels inside our journeys. But this book is now my #1 reserve. No book come near this one. This is by far the best spirituality book I've read. It truly is worth reading. That is a book that may change your daily life - in a great way. It really is life altering This book is incredible. It challenges your world view in ways you might have under no circumstances imagined. Biology and chemistry explained how, but I asked how do they "know" what to do? Wow! My scientific background/ mind helped me understand and embrace spirituality concepts so much more. Well at least for now. Transforming, Hopeful, Profound Masri says bluntly what others only hint at. Yet I believe that this world view will pass on as the globe becomes more educated and wiser After all, mystics have already been telling us the same thing for ages. Letting you know what it is will have little effect right here so I won't. Browse this wonderful book. There are plenty of very good stuff here.Shortly after I figured, a health crisis shocked me to the core, so very much that for the first time in years that I actually thought about God. Not really that Marsi is from this. Only that it's naïve and incomplete and could lead to disintegration instead of integration.. (Start to see the booklet, "Manifestation Happens" by Joey Lott, on Amazon) Marsi e has valuable pages on recognizing and dealing with our Shadow, something chirpy "positive" New Age people have a tendency to repress. I also was impressed with Mari's explanation of what we should shoot for, what really offers meaning to our life. The reason why that I have chosen to devote myself to living a spiritual existence is because spirituality and science usually do not contradict. Masri offers experienced and lived what's in this publication. Anyone who takes his wisdom to heart, and builds and expands onto it, can become a fresh person. Thank you A bunch of additional books all copied to one. It resonated deeply and I have already been sharing excerpts the whole day Gratitude This book provided me with an improved understanding of the internal tug of war I have been going through the past few years,, perhaps longer. Masri does an excellent job at combining prominent spiritual literature and scientific evidence. I had no complications understanding the information, as

nothing was beyond my comprehension, and filled me with a sense of peace and joy. THEREFORE I asked God, "Why me? I resonated deeply with this and love the way it was presented Loved it and will share it with everyone I know. No new ideas. I fully support science exploring questions that not in favor of the "status quo", but Dr. They are thoughts predicated on a book dialogue group. Excellent book !! We cannot even observe or hear or go through the majority of what's "around" us. It really is just like you were in my head because this is often how I clarify it to myself also to others.it provides a great sense of wish and encourage to practice to be a more love giving person.Why am I here? I understand a lot about spirituality But that one is by much the very best. Took everyone else's thoughts and analysis and copied into his very own book. Emoto had not been a genuine scientist, and his experiments were not only badly performed but cannot become replicated on a more substantial scale. This book also argued against Darwin's development theory. Although I am open up against additional interpretations, I did not find his rebuttal to be logically audio. I thought I understood it all." I kept picturing my own body, every human body, really just a composition of trillions of cells (and therefore, atoms, subatomic contaminants, etc), each working night and day to preserve us alive. There have been a few other intriguing stuff as well, but overall it was filled with too much misinformation.
