Great book As a Hospital Chaplain, they are the hardest events to work. I was hoping this book would provide further insight and it fulfilled everything I expected of it. book review This is a good basic read for people who help others with grief work. It really is useful in its scope and is a good book that addresses varied topics regarding grief. Grief is a highly individual reaction. Five Stars Item arrived as indicated A critique Coping with Grief after Sudden Loss provides the reader into the world of the survivor. Leading thanatologists, achieved authors and those employed in the field of reduction and transition weave their experience in a book that handles the grief proces and unexpected death. The tragedy offers shattered and permanently changed the world in which he or she lives. Survivors of sudden loss need both brief and long term intervention. Survivors of sudden loss are often coping simultaneously with both grief and the increased loss of their regular world. The book covers five critical sights. Living With Grief: After Sudden Loss Suicide, Homicide, Accident, CORONARY ATTACK, Stroke This is a great book and I would highly recommend it to anyone going into counseling and also for a few parents who have a problem with their child's death. I've not seen anything near as good. The publication is a very important guide for anyone functioning the field of death and dying. The book was written for those attending the 1996 Hospice Basis of America's third annual teleconference. Caregivers at all amounts may be suffering from traumatic loss therefore self-care is critical. Ken Doka's book, Living with Grief after Sudden Loss is a book best reccommended for those working in the field of trauma. I have not seen anything near nearly as good. There is a lot validity in the work and proves itself as an all in a single source for living with grief after sudden loss. Different types of sudden reduction create unique issues for survivors. I still get back to it occasionally as ... This book and God's grace got me through my son's suicide. The chapters are compiled by leaders in the field, the findings are substantiated by empirical analysis and the topics protected are critical issues that need to be understood. I still go back to it sometimes as reference material.
