Lifestyle Sports and Open public Policy is the first book to develop a comprehensive understanding of the interplay between life-style sports and the general public policy environment which frames and regulates them. II talks about the use of lifestyle sports to market policy agendas such as improving general public health, while Part Component This reserve is a valuable source for anyone with an intention in lifestyle sports activities, leisure studies, sport tourism, leisure management or sport policy. Component Drawing on an array of lifestyle sports activities from around the world, including parkour, skateboarding, mountain biking and climbing, it identifies the critical issues facing practitioners and policymakers as these sports become increasingly popular. III considers the effect of public sector regulatory actions on the approach to life sports industry. Each part contains case research which investigate an insurance plan concern from the perspective of a different life style sport, including some sports activities which have typically been under-represented such as rodeo and curling. We examines general public sector bodies that provide way of life sports opportunities to the general public, either through funding companions or by managing facilities themselves.
