Created for the upper-level undergrad or graduate level majors program, Advanced Human Nourishment, Third Edition provides an in-depth review of the body and details why nutrients are essential from a biochemical, physiological, and molecular perspective. A variety of pedagogical components within the text, such as for example "Here's Where You Have Been" and "Here's Where You Are Going," help clarify key points from the chapter and provide real-world good examples that bring this content alive. Through its writing design and numerous figures and illustrations, the Third Edition clearly outlines metabolism and the molecular features of nutrients. • "Particular Feature" boxes on focused topics add depth to the chapter and, in some instances, allow the college student to view the use of basic research. New and Key Features of the Third Edition: • Includes brand-new chapters on Fiber and Nutraceuticals and Functional Foods • "Before You Go On" sections asks students to reflect upon what they've just read, urging them to return and re-read portions of the text if they do not readily grasp the materials. • The end-of-chapter summary reiterates key points from the chapter and helps college students plan future exams.
