Medical Nutrition Therapy: A Case-Study Approach

[continue reading](#)

Building a bridge from classroom to clinical practice, this casebook comprises 32 realistic case research befitting introductory and advanced level courses in nutrition and diet therapy. interventions; The case is usually followed by a number of questions that focus on pathophysiology; assessment; medical, dietary, and behavioral outcomes; Each case study uses the medical record as its framework and you "solve the case" utilizing the info provided such as hospital admission data, laboratory test outcomes, intake/output records, and the physician and other health care provider progress notes. Objectives within each case are designed around the nutrition care procedure and competencies for dietetic education. This "real life" approach prepares you for the professional setting up. and appropriate follow-up for the individual.

Five Stars Good! Unless you have a great teacher, this book isn't a learning tool I would have preferred a reserve that walked you through each case, or at least walked you through one particular before one was assigned. Unless you have an excellent teacher, this book isn't a learning device. But this publication is simply a publication of assignments and is usually more valuable for teachers than it really is for students to understand from.
