Unique NDE according to WHY Writer had Cancer - Few NDE's Return and Can Recall WHY I have read THOUSANDS of Close to Death Experiences and THIS ONE had an extremely special spoiler I'll not share--but it WAS the ONLY cause I bought this one book. This NDE transcends all cultures and all religions. I am female and wanted to know HOW my lover experienced when he passed. Since both passed away of same rare disease. It is one of the most inspiring memoirs I have ever browse. These books will often have some sort of agenda to press, but fortunately this is simply not the case with Anita Moorjani, she is a breath of fresh air, something I am eternally grateful for. Nevertheless her reason and my lovers cause does not mean it is everyone's reason who's departing w cancers. But his character was the same as his and mental positioning. I had not been with him when he died because his cell phone was left in the ambulance and he could not call me - meantime I was in another town looking forward to him and seeing a big crowd dance it front of me and following me around. Forget various other spiritual/NDE books, just buy this one Up and coming author Anita Moorjani's debut publication Dying To Be Me is undoubtedly probably the most important books of 2012. Instead, just buy this publication. "Dying To Be Me is without a doubt a ten star book, a book with general charm and with a message that will never lose its relevance to spirituality also to living a happy and fulfilled life. That gave him all the energy in the globe despite the fact he appeared as if our science school skeleton. I purchased this about Kindle a couple of years ago show I hope it still shows up mainly because a "verified" review. my husband and mother-in-law have read it and we have some very deep conversations approximately the message Anita has shared This is actually the third Dying to be Me personally book my husband and I have ordered. When I go through it many years ago it touched me deeply and I knew I would never look at or approach life the same once again... And it didn't happen when I 1st examine it. Since my preliminary reading, my hubby and mother-in-law have read it and we have some fairly deep conversations about the message Anita offers shared. In regards to a year ago a pal of my husband received some bad news... Words can not tell how very much I love you and I am very appreciated Anita and others who let this book come to your life. It also makes a compelling case for the skeptics of spiritual phenomena, as her spontaneous remission so close to death is original and medically documented and verified. For our close friends wife the discomfort was so bad she was trying to figure out how exactly to kill herself merely to end it all. My hubby ordered her Anita's reserve and curing meditation CD. I think as more and more people understand these stories, we may stand a chance of letting go of all our fear-based self-destructive patterns, including battle, addiction, disease, and poverty.. The largest myth that Dying To Be Me dismisses is normally that becoming spiritual or living lifestyle must be hard work, that we need to function hard for a favoured position in the afterlife, that people need to suffer and make sacrifices for spiritual advancement, enlightenment and perfection (such beliefs will be the foundation of most religions and New Age thought).but she has portrayed to us that Anita's book filled her with such a feeling that everything, even death is ok, there is nothing at all to fear. She has no dogma to force onto the reader. I really connected with this book This is actually the second time I have read "Dying to End up being Me", every time I get more out of it. Found this book when I saw this book upon a FB list of all-time preferred books. I am not sure he is open to go through this but I'll see how it goes. Dying to become me is a book that evidences why it really is so vital that you live a 'love' centered life. I have have huge variations of religions and belief systems in my lifestyle and what Anita writes is what resonates the most with me. I know I have spent the majority of my life not really loving myself which is the route I choose to finish living my life on. Anita doesn't state to be a spiritual guru, she doesn't peddle any sort of agenda as much other spiritual authors do. Choosing to love yourself may be the only thing we have control over. Recommend. Anita Moorjani's account of her experience is one of the clearest, validated, and instructive accounts to this effect. I will not write here that she miraculously healed because that is not a truth. Occasionally the same thing would be stated 3 times in the same page. I will give you my spoiler--it was HIM telling he was content. After reading her publication and rushing to the part of her actual loss of life and her discovery of WHY she had malignancy in the first place-I was positive this is actually the same reason I dropped my lover. In these webpages Anita shares in the most touching and center felt of methods her personal history, growing up different, the tension cultural expectations created within her and the events leading up to her getting cancers and experiencing the most wonderful of near death encounters at that time her organs begun to shut down in the ultimate hours of advanced stage Hodgkin's Lymphoma. During her NDE Anita awakened to a heightened state of recognition

which allowed her to comprehend why she had cancer (among many other issues) and accessed circumstances of unconditional loving energy that allowed her to gain complete recovery of her health. I want not elaborate on Anita's story any further, as it can be go through in her NDE accounts at the Near Loss of life Experience Research Foundation website, and there are also many different interviews available online for those who are not really acquainted with her story. It is like you stepped inside my globe and know just what I have been through, how my spirit has grown. My lover passed away a couple of years ago from the Equal EXACT condition and I mean because of her (this author) getting so wasted muscles wise and apparent to most people she experienced zero possibility to live not to mention come back and have a good body again. I'd like to emphasize that in spite of being a book in regards to a near death experience, it has a much broader charm than most other NDE books and is in my opinion multi-disciplinary. It really is of huge worth to anyone thinking about the regions of near death experiences, loss of life, dying and bereavement, cancers, spontaneous remission, the mind-body romantic relationship, mind-body and energy medicine, reincarnation, or to anyone who basically wishes to examine the way the universe and lifestyle works in general. everything within the body (skin, organs, etc) start to thicken and tighten to a spot of such severe discomfort that it's debilitating. Nevertheless the editors didn't do a good job editing the publication. What impresses me most concerning this reserve and about Anita's message is that her NDE pertains a lot more to life and living than it does to loss of life and what we can expect in the afterlife (although this topic is also covered in the publication). This is an excellent book and one that ought to be read by anyone who wants to enhance their lives. Frequently spiritual books may create even more existential fears and tensions instead of alleviate them with mention of concepts of sin, karma, pre-life planning of car accidents and illnesses, "soul lessons", soul levels, hell, punishment etc. Her publication is VERY special way more to people losing someone to cancer. With so very much fear running rampant now we can see all the damage that is the effect of it. This is a profound publication and one that must be examine to truly get an understanding. Instead she has an incredible story to inform (which she does with amazing dexterity in the English vocabulary), and shares from her NDE the countless insights she gained into her very own life, her own malignancy and life and living in general, insights that anyone can reap the benefits of. Whether that's people or animals or plants or whatever. At the same time Anita offers an outlook on life that is relatively easy to implement-DO WHAT FEELS Ideal FOR YOU, DON'T Perform WHAT DOESN'T FEEL RIGHT FOR YOU, everything else in lifestyle is secondary. In case you are embarking on a search for spiritual knowledge or if you have been on one for many years, don't buy 30 New Age books on soul mates, twin flames, soul lessons, law of attraction, indigo kids, soul progression, karma etc, such books have small to do with the greater cosmic reality and for me, generally, the concepts discussed in them are misconceptions at best, in other cases simply simple lies. Such books can develop a significant destructive and toxic belief program and may make living lifestyle more difficult and complicated than it requires to become. Meantime I am texting another friend I might be dying soon because this crow was dance and pursuing me around. It can help you remove the clutter from your own mind, your way of thinking and from your own life as well.. In the absence of such concepts Anita provides us with a much lighter and fulfilling perspective on lifestyle, allowing us to be more effective at getting ourselves. In Anita's own words "If you think you need to work hard at being spiritual then you haven't first got it yet. We had been to meet up at a concert understanding he just had days so Doctors were just letting him go out and live life on tons of prednisone. Gave me more self-confidence. Loved this book. Strongly suggested. Amazing book ?? I love your reserve Anita and has appreciated each sentences. I noticed myself in your book. Nevertheless, if you are looking for a cliché NDE book with tunnels, white lights, angels and God you will be disappointed. his wife had scleroderma, a disease within the body that produces an over-production of collagen; Amazing! I felt attracted to read it again a week ago and a couple days into reading it I got informed of my brothers terminal cancers diagnosis. Have been posting her insights since and have purchased multiple copies for close friends. Another Hopeful Account of Why Fear Is certainly Such a Waste materials of Time I have read accounts and watched video clips of near-death experiences for decades, and I hear clearly that there surely is no need to be afraid. A peaceful read! But after a few moths have got passed, I realized how much Anita's story has impacted me. Much like any book that talks about NDE's, you need to be open minded to learn it and or believe that people die and come back. This book is lifechanging! Just to read "our emotions are actually what travel our physical reality" is existence changing in itself.

Anita's book is easy to read and full to the brim of excellent advice and life ideas to live by. It is rather difficult to approach somebody in that mind-set about thinking differently concerning a disease which has so much dread surrounding it. A wonderful examine! But, the most crucial thing about this book is that it will go deeper than just telling about the loving experience on the other hand. Anita's NDE has clearly changed her life but it in addition has brought her back with a tremendous message for the earth. She explains that developing our self recognition not merely helps us but helps the global consciousness. The simple message about self-love appears to cut out all the periferal 'stuff' that probably diverts a lot of us from just living a lifestyle we love. It can help us get rid of the clutter inside our lives also to focus even more on what makes us happy and brings us joy in life, along with removing any existential phobias we may have got stemming from the fairly unknown realm of loss of life. Drink each and every time you go through "tapestry" / "other realm" / "felt as though" No doubt Anita's message is a good one and one the world requirements. I'm Really happy she shared her tale. Furthermore to Anita's fantastic message, I would hope that her views on cancer provide food for thought for oncologists all over the world, and switch the way the world and in particular the medical profession thinks about, views and treats malignancy. It was hard to finish and despite its size, it still left something to be preferred. It got repetitive and I found myself cringing each and every time the same words were used over and over to explain something, this is all through the entire book. I highly recommend this book. The whole lot reads such as a wordy blog page post than a book. Fantastic Read! What a brave collection of terms! It reminded me that ME coming first is the only act that may ever really be off support to others. For me Anita's NDE and the insight she gained from it tremendously helped me overcome much cognitive dissonance which originated from reading various New Age spiritual, self help type books, and put life into a much clearer and more logical perspective. Many thanks so much xx Eye opener This is a life changing book for me. I felt empowered. The author has a very authentic voice, her words had the capability to raise a state of vibration. I am grateful I came across this wonderful publication. I recommend it.
