Best book upon this subject This book has been life changing for my children and myself. My mom, grandmother and many other family all experienced cancer starting within their twenties and recurring until they dropped their battles. I tried to end up being preventative by getting my yearly mammograms (because the age of 18. Brain Tumor. I also had genetic testing done. The numbers weren't in my own favor (86%). That verified it for me - I turned heel and ran as fast as I could. To them, it had been my best measure of prevention. Many thanks Ty & I instantly stopped after the first medical procedures. After phase 1, I traveled to speak with other doctors and was given the book and docu-series THE REALITY ABOUT CANCER. It had been the best book I've ever read on the topic (and I have read too much to try to understand and stop cancer.) I finally had the reality behind my decision. As I am typing this, our personal Tim Noakes has simply been discovered guilty by the SA Medical Association of advising a mom to wean her baby onto a minimal carbohydrate, high fat diet..
