I love Tanya and think that she actually is a great youtuber I love Tanya and think that she actually is a great youtuber.. I acquired rid of the duplicate I ordered. I understand her demographic is probably younger, but how about the rest of these who watch her? I believed it had been very interesting. I love Tanya Burr.I am a big fan of her channel and also have followed her for a long time.I acquired this as a gift from my hubby (hence the review from his account)And the publication is just okay.If you are a fan, the contents of the publication will be nothing at all new or surprising. Best book I've bought in quite a while! Love Tanya. She also includes pages at the end of each chapter so that you can fill in various things such as "top 10 essential items in your makeup handbag" (which she also lists hers). She gives suggestions on makeup, skin care, fashion advice, hair and nails, coping with anxiety, love, youtube, quality recipes, and everything in-between! I have already been watching Tanya for about a year now, and I can truly say she's the best youtuber. It's filled up with beautiful photos throughout of her and her life from when she was a child to present. I have the hardcover which I believe is only available in the UK, which is normally where I purchased it from.. I maintain it on my make-up desk because I always go back to it for tips about pretty much everything listed above.. I love tanya so theres no chance i would not like ...! But my publication came with the cover somewhat broken and the contents in the publication is certainly for the folks who are enthusiasts of tanya. If you don't know tanya, the reserve might bore you. Girlfriend liked it cool I Love Tanya!. love, baking I never thought We'd pick and choose this up, however when I found it at a charity shop for €3 I figured We'd give it a go.. Five Stars Like the book and tanya's recipes! Great informative little read! I examine it through therefore quickly! Has a little bit of everything, including personal tales, recipes, and guidelines! If you love Tanya Burr then certainly pick up a copy of her publication. Tanya Burr was among the 1st beauty YouTubers I subscribed to, and while I am no more a subscriber, I do value what she trained me. This book is divided into many parts: early existence, skincare, makeup, locks and nails, fashion, like, baking, confidence and happiness, being healthful and so on. Just okay.. I'll certainly try out some of her baking dishes, and the juices she stated. What I liked most may be the parts about self-confidence and body image.. Through the publication, she made several lists and allowed you a full page to write you own as well. Like Tanya. Or your travel programs. Like, your favorite childhood memories. Definitely worthy of the amount of money!.. It was great to read a bit more about her lifestyle, aside from the YouTube factor.....Love Tanya, great role model to young girls not that I'm that youthful anymore, but We thoroughly enjoy seeing existence through the young ones and in such a respectful, encouraging and uplifting manner. I love a motivational book, which I find in this, lots of opportunities to create your own goals, thoughts and desires.Everything in this book you can learn watching her videos. Must read Granddaughter loved this one. It's a little bit wordy, but if you are into that, it's really worth your time! I really like tanya so theres no chance i would not like it. That doesn't happen very often. Just watch her video's become familiar with more about her... I go through this in I setting.... It required me a few hours..... I want her many blessings in life... Now the baking reserve I'm gonna like because I am known for my cooking food, baking.... Maybe I can get yourself a few new dishes... It still surprises me that a 26 year outdated who just talked to a surveillance camera a few years is now a millionaire and she has a baking book even though she cannot have an excessive amount of experience ( she's only 26) ....Seems like right now there are probably many more people out there who would be a lot more deserving to possess a book manufactured from their recipes (I can think of several older women who actually are amazing bakers, cooks who we would actually get some experience from)....I only bought this because it

came along with her new baking book at a reduced price for both. Certainly worth the money, you won't regret this buy!.I guess life's not reasonable.. You won't regret it!. Tanya has hardly done anything to become millionaire. This book was absolutely amazing... Some people get so many breaks. The pages are very sturdy, thick and glossy.. I'm sure somebody will defend her... but really you hold a camera , speak to it, edit your videos, download.. However, this publication is for kids, seriously.. become famous..... haha...seriously. This kind of thing is a tale now... I think, if you have therefore many subscribers of which many are girls, it's important to talk about it.
