We have since ordered more ADHD interesting books and are enjoying them as well. He says he loves that there surely is a publication about children whose brains work just like his. When we first started reading it we had a problem with him "blaming" his ADHD for a few of his negative options and behaviors but we kept reiterating to him that it is not an excuse or grounds to make bad choices, it just means he must work harder than other folks to make good options and it appeared to stop. We bought this book for our boy who has ADHD and it was very informative not merely for him but also for us aswell, we enjoyed the illustrations and the newfound knowledge of how to live with this.
