Five Stars My 9 year-old daughter loves this book! can you survive the desert? Four Stars Not really for the faint of center,very realisticMy 8 yr old and I browse these together Great for children and fun for adults too. My youngest daughter (age 10) is indeed into these books. Even after you surface finish with the storylines, there's more stuff to read: a bottom line that briefly goes over survival in the desert, a section that tells about actual survivors, and a three-question quiz to test your desert survival knowledge.World War II Spies. Im reading the others currently.. will obtain again Great..will obtain again!! Based on your decision, you are given a page quantity to turn to and start reading. From then on, you are given choices nearly every step of just how; with respect to the decisions you make, you either survive the desert or you do not.The storyline about the Sahara is quite sloppy. At one stage, it randomly asks you whether you wish to proceed towards the lamps, when it hadn't mentioned anything about lights; at another stage, it says to turn to a page, however the new web page has nothing to do with what you had just been performing. That section seriously needs some editing. Good puzzle type book. Try a few of the other YOU SELECT books, like She wants to make different choices within the books to see the various outcomes. Then there's a glossary and a bibliography.If it weren't for the issues with the Sahara storyline, I'd give this 5 stars; but as such, I don't think it's worth the amount of money. It's well-written and incredibly informative.IS IT POSSIBLE TO Survive Storm Chasing? or Five Stars Great book for struggling readers - very interesting! Educational I was educated with the best way to survive in the desert.Besides that, the book is fantastic. Great. Very interesting and interactive! Wow!! Reading it really made me feel just like I was journeying through the desert. Needs Editing In this book, written for ages 11 or more, you are given three options: to start out in the Sahara desert in Africa, in the Sonoran desert in THE UNITED STATES, or in the Gobi desert in Asia. Even though I have never been to the desert, I feel like I have after reading IS IT POSSIBLE TO Survive the Desert?!
