Exam Review for Milady's Standard Professional Barbering

[continue reading](#)

A simple, powerful tool for the Barbering pupil, Milady's Standard Professional Barbering, 5e Test Review contains chapter-by-chapter queries in a multiple-choice format to greatly help students plan their state board examinations. The questions themselves are exclusive to this supplement. The answer crucial at the back of the book allows students to check on accuracy and identify weak areas.

Def. recommend We took my barber examination in January & I have to say this is -one- of the things that helped me a whole lot.. Unless you're still in school & still going right through the text book, the chapter testimonials are helpful!! I failed my Barber Test in Maryland studying this book .. I generally studied the THREE condition board exam evaluations (each with like over 100 queries) on the back rather than the chapter reviews. We failed my Barber Test in Maryland learning this book. The questions were very different on the actual examination. The wrong one was order. I required student workbook . Young Barber This book was utilized by my son in barber school.. Two Stars It' really not up to date with current work books The wrong one was order. I needed student workbook.. worth the price It's a great publication and it has all you need to prepare yourself.. Five Stars Great book Five Stars This has help my son study for his major barber testing..if you value barbering you'll have no problem wanting to go through good knowledge for future years.
