A complete, thorough, and pragmatic guideline to clinical evaluation, this authoritative publication meets a key dependence on both college students and practitioners. Included are complete, systematic reviews of widely used instruments together with approaches for selecting the best options for particular referral queries. Mark Harwood, Larry E. Beutler, Gary Groth-Marnat, and their associates explain how to construct a "moving picture" *A fresh extended case example runs through the entire chapters. T. Readers figure out how to conduct integrated assessments that consider the complexities of the average person personality into consideration, serve as the foundation for developing an effective treatment plan, and facilitate meaningful reporting and client feedback. Not used to This Edition *Incorporates the most recent research findings and assessment/treatment planning equipment. *Critically evaluates the recently published MMPI-2-RF. of each individual by integrating data from a variety of sources. *Chapters on the Personality Evaluation Inventory and the NEO-PI-R and NEO-PI-3.

Shipping method left glue residue The book itself is fine, essentially brand new. I knocked off two celebrities because they made a decision to put it within an adhesive envelope that was too little and the adhesive left sticky residue all on the top of my book. Excellent! It will take me a while to get the residue off and the webpages to stop sticking together. Five Stars Excellent book. This publication breaks down the concepts and gives a thorough review. Quick! After waiting around weeks for this item, I was displeased. Fast shipping! Excellent resource My assessment textbooks are dense and hard to understand.
