I did like this I could produce copies of the rating scales rather than needing to continuously reorder sets of protocols. I found the book did not contain as much information as I'd have enjoyed on interventions and tips for differently scored ratings. The rating scales didn't address the range of feasible ADHD behaviors I'd have liked to observe. I would possibly use it as a common screener to identify students who may need further assessment of interest areas. I purchased this scale as a school psychologist working with college students ranging in age group from 5-21. I did so like that I was able to make copies of the rating scales rather than needing to continuously reorder pieces of scoring protocols, but this scale was not technical plenty of for diagnostic purposes in my opinion. The scoring was quite vague.
