Great info but seems a lot of money for information .Costs Jenson Professor of College Psychology University of Utah Latest and Greatest "I have a special shelf in my own office where I put the 'latest and greatest.' That's where I put Hill and Frank's new book on psychological and behavioral disorders. All of the authors should be commended since it is a daunting task to put together content based on evidence-based procedures as Kauffman indicated in his epilogue since it requires rejecting very much "evidence" as unscientific.....because they value evidence-based procedures, applications in college, defensible foundational knowledge, systematic assessment and evaluation, and rigorous research methods. They asked the very best experts and practitioners who talk about similar ideals to contribute and make this edited publication one of the more essential on my shelf of favorites. For the 'latest and greatest,' get this reserve." George Sugai, University of Connecticut The very best research text available about educational practices for children and youth with emotional and behavioral disorders.
