Actually didn't like how this book featured a lot of "corrective makeup. Actually didn't like how this book featured a lot of "corrective makeup. So maybe he left out advice on shades because that's such an individual decision. Skip that one. Great Ideas. But also, be aware that there are better and even more thorough books for beginners - and also better and more thorough books for inspiration. The ideas and technique, while valid, assume understanding of application methods, appreciation of colours and understanding of the various formulations and items. I decided to look over this reserve with my niece who is 13. Wish the Photography Was EASIER TO Show Them Off 10 Minute Makeup can be an easy to use/examine guide to creating 50 simple or dynamic make-up variations. It will be a perfect gift for an older teenager or someone getting their first job, paired with among those huge makeup packages! There are a handful of web pages of beauty suggestions for each age decade and some help techniques when make up goes wrong. The publication is very well designed. I doubt that a lot of of the looks can be pulled off in 10 minutes except by the most experienced. I cannot see myself flipping through this publication again, but I do still get back to my Kevin Aucoin books, because even though they are getting outdated, the looks are timeless and I always learn something new. I specifically liked that we have photos and illustrations, helping to better illustrate the techniques and styles better. The writer also smartly put a assortment of the after-image photographs in leading with page quantities to make it no problem finding a specific style. As the title suggested, these are super easy to recreate looks that don't have a large amount of time. There is very little diversity. The only thing I didn't like (why I'm giving it 4 stars) is that it doesn't provide information on what kind of make-up shades to look for when you are shopping to find the results in the book. Nothing about the technique or last look is innovative more than enough to intrigue make-up veterans. Imperfect Geared to teens and youthful women, this book provides basic tips and techniques in addition to fifty distinct appears." Overall, I'd suggest skipping that one. Alas this is not a publication for beginners. The step by step guide shows before/after photos, illustrations with the makeup, tips, and tips to attain the looks. Almost all the makeups are basic (just a few crazy ones, fortunately) but all are complete looks. Nor perform they might need a wide range of tough to get or expensive tools/cosmetics. just how much more simple can you get? My everyday morning routine goes something like this: moisturizer, brush on mineral powder, a little blush on the cheeks, maybe mascara and lipstick. Why not celebrate the differences instead of wanting to camouflage it. I have pale skin (like about 75% of the versions in the book), so I think I can manage, but I still could have liked to have observed it! Of course in the event that you adopt one of is own appears and circle your eye with tons of reddish colored and purple eyes shadow, no one will notice much else. Which brings me to my next point. Most of the looks are much too editorial to be used for everyday or also special occasions. It appeared that the make-up was wearing girls not the additional way around. Youth has a beauty all its and burying it under a great deal of heavy makeup is just silly. Makeup should enhance not really overpower and I doubt most parents, including Morticia and Gomez Addams, would allow their daughters out of our home with a number of the looks. That being said, the book is of interest with a hard cover and plenty of color photographs. But there are far better for both instruction, discover Makeup Makeovers: Expert Secrets for Stunning Transformations, About Encounter: Amazing Transformations Using the Secrets of the very best Celebrity Makeup Artist, or Jemma Kidd Make-up Masterclass: Beauty Bible of Professional Methods and Wearable Looks and inspiration Face Forward, Makeup Your Mind. Great book filled with makeup basics I really like this book! It is fundamentally a beginner's help to 50 different makeup looks. She's beginning to use make-up and I believed it'd be a great way for all of us both to understand something. It

offers step-by-step guidelines and diagrams - also what elements of your eyelids to place the eyeshadow on - I love that! The book is broken down as follows: Fundamentals (skincare, brushes and tools, products) and the 50 appears, with sections based on emphasis on everything from concealer to eye lashes and smokey eyes. Females, especially young females, are subjected to so much unrealistic conditioning they are able to never be satisfied with their appearance.. I've been told I've "good skin" (whatever which means) and just hardly ever got into the make-up craze when I was younger. I've always read fashion magazines and have picked up a few things here and there, but this provides all of the info you could need in a single place. This book can be organized very well. Close to the front, now there are 2 pages with thumbnail photos of all looks so that you can see them all at once and decide that you want to do that day. :) It also has several details / technique pages covering base, concealer, blush, face forms, eyes, pencil eyeliner, eyelashes, liquid eyeliner, lips, smoky eyes, and eyebrows. I must say I love the contouring info on the building blocks page and plan to try this! In every, an excellent and practical book disappointed only by the somewhat boring and often harsh photography. Play up your square jaw, big nose or slim lips and celebrate your individuality. If you are clueless like me, I assume you could take the publication with you and ask a salesperson the type of colors to buy. It can, however, cover what types of makeup (base, blush, etc) and brushes to get." Not a fan of makeup artists telling women what's wrong with their perfectly regular and beautiful features. In any case, overall this is a wonderful book, ideal for anybody clueless or a beginner at makeup! Simple tips for beginners and beyond I actually willingly admit that I know next to nothing at all about gaining make-up. I was disappointed that the author adheres to the belief that oval designed faces are perfect. I anticipate using this reserve to instruct myself! Although I found the pictures of the after photos to be a little lackluster, I did value that the books can be incredibly easy to follow and had some great information inside. The appears are "classic" enough that this will not be useless in a couple of years, and they range from natural-looking to very multi-colored (I believe all but 5 could possibly be worn during the day). The first thing we both liked about the reserve was the picture index in leading challenging looks by amount, so you could easily find someone to flip to. I love huge, glossy photos of intriguing makeup looks and step-by-step instructions. The step by steps were easy to follow and the outcomes were close enough, as long as you had the tools needed. There is not much to offer makeup novices that might help improve their abilities (sweep one color of eye shadow across your eyelid. While there is some good advice given, the majority of it is not particularly helpful or practical. I like the basic approaches for applying base & I could see performing some fun experimenting with some of the even more outrageous looks with my girlfriends when I was a teen. The book also explains different tools & tells you those to make use of for a specific look. Knowing more info on eliminating dark circles is excellent as well. There's some strange runway looks #43 through #50. Many of the versions in the book are not very attractive without makeup. I suppose that was done deliberately. Overall, there are some good tips to keep in mind, but this publication is more fitted to a younger person in their 20's. Modern. Great modern constitute, from no constitute look to even more dramatic. Easy to follow directions, it was refreshing after other icon make up books I've (like Kevin Aucoin). It just less information and easier to look through in the event that you in the hurry (like me mom of 2 toddlers who still enjoys make up and other things;) Ideal for teens and adults That is an expertly illustrated book on how to apply makeup. I found it actually easy to follow and picked up on so many fresh tricks. I looked more polished after trying a few of the looks in this book. The book also information how to cut your routine down to ten minutes. With a little bit of practice which book you can perform a full face within

ten minutes that is current and attractive. A perfect gift for teenagers that will keep them busy for weeks. There have been a few tips sprinkled throughout, but they were few in number. Wow, this is not what I expected at all! I've got an entire shelf of makeup books and I'm always seeking to expand it. Geared Toward Younger Demographic Although this publication is aimed even more toward a younger demographic, there are still lots of tips that are useful if you ask me. And the images are WAY too theatrical to be utilized as a practical guide; almost all of the ladies in here are wearing brightly-coloured make-up applied in every sorts of truly ridiculous methods. I finished up giving this publication to my children so that they could flip through it and look at the "funny ladies. Preceding the appears section are thumbnails of the various looks. Great Book For Teenager Women and Young Women "10-Minute Makeup" by Boris Entrup is definitely filled up with terrific and dramatic photos of versions' before, during, and following shots. I love huge, glossy photos of intriguing makeup appears and . concealer. There are plenty of ideas and directions on attaining a number of looks. Honestly, I thought a few of the models looked better in their photos displaying them without makeup because they ended up with way too much makeup on for their personality. Still, a fun book to check out if you're older and know the majority of the concepts and suggestions are not gonna fly for you unless you're Tina Turner or Cher. Definitely intended for teenagers and youthful adult females... I thought this publication would show realistic approaches for applying make-up in a sophisticated way. For it saying that we now have looks "from clean and natural to catwalk chic" I would agree although inside our opinion they leaned mainly to catwalk. After pouring over 10-Minute-Makeup, I can't help but feel somewhat disappointed, especially when in comparison to my Kevin Aucoin books. The appears in this reserve are either excessively simple or on the impractical clownish side. Not useful for learning everyday make-up methods. I'm not necessarily sure who this reserve is meant for. For us though we found that a lot of the looks were very much to drastic for everyday use and we ended up making tries to tone them down.. I myself am in my own mid 30s but will always be a reluctant tomboy since no one ever taught me this stuff. The models are extremely youthful with flawless complexions and full, pouty lips.). However, the more daring looks mostly simply involve using garish, rainbow colours. Received as an ARC from the publisher. Interspersed in the 50 designs are various techniques.
