Among the best books I've EVER read (and I read alot) Bought this book 25 years back, and it changed my outlook on life in those days. Bought 5 extra copies for friends to provide away I was so impressed. Most didn't read after that it when I'd inquire. Will help in your spiritual journey. Gave myself more time to procedure what I was reading. Read this book once again to gain balance and accept the circumstances I was dealt. It really is true that whenever the student is ready, the teacher can look. Am I searching for a particular response? It appears when you get older you have period to delve into your soul problems. Then the worst period of my life hit me at 67---my child died in a car accident. Was completely devastated for 90 days, looking for any reason to stick around. This is a book like no other This is a book like no other. Purpose is everything. Now the people I acquired bought this book for 20 some years ago have examine it and explained they wished that they had go through it years back. So do yourself a good service and buy this book. There are therefore many amazing concepts I'd highly recommend reading this book. We am now ordering more of this book for gifts once again. I have now bought all of Zukav's books and all are wonderful and insightful. Go through this one first. I wanted to such as this because Oprah helps this guy so highly. 1 day I looked through the bookshelf, pulled out this book for the 3rd period, and it helped conserve my life, even though I still grieve.. What do I am hoping to escape this?.. Author is a traitor to awareness." "The Universe backs the part of you that is of clearest purpose. It sparked my thirst for more understanding. The book is damaged into the following chapters: Evolution, Karma, Reverence, Cardiovascular, Intuition, Light, Intention, Choice, Addiction, Relationships, Souls, Psychology, Illusion, Power and Trust. The most enduring lesson I received from this book is that my intention creates my reality and that I could manifest anything in my own life through conscious intention. I consider myself to be "on the path", and gained very little out of this writer. "Every actions, thought, and feeling is motivated by an purpose, and that purpose is a cause that exists as you with an effect. If we participate in the cause, it is not possible for us never to participate in the effect. In the most profound way, we are held responsible for our every actions, thought and feeling, which is to say, for our every intention. I would recommend it to everyone who is interested in going deeper. Sometimes I've found myself not attempting to accept the fact that I have indeed created a specific outcome but when I examined my motives and my intentions I usually found my part and thus the truth of a particular situation. After reading this book, I questioned my motivation and intention of everything I did and looked at my behavior in a new way. I attempted to minimize complaining and started requesting myself inquisitive questions such as: What is my intention with posting this? Met a few people who were interested in the book so I bought them each this book. I first examine it in 1998 when I was nineteen and it ignited something inside me that was so profound. It's a never ending journey publication. Am I ready to accept all the consequences of this choice? Here are a couple of the best lessons from the book: "Forgiveness implies that you do not hold others responsible for your experiences. I hardly ever accepted the view of karma the theory keeps you perpetually in a state of incorrect doing keeping you permanently trapped in earth prison. It is the use of your will." "Only by feeling compassion for yourself can you experience compassion for others. The lessons I came across among its webpages inspired me to embark on a personal journey to become the best version of myself by living a more fulfilled conscious lifestyle full of purpose." "Temptation is a dress rehearsal for a karmic experience of negativity." I wasn't able to relate to everything Gary Zukav talks about in this publication. The idea that my soul is part of a huge mother ship was a little too very much for me to understand or understand, so the parts I didn't like I overlooked. Instead, I chose to concentrate on the lessons that spoke if you ask me and I dismissed the rest which is normally my philosophy for just about any nonfiction book.---it could save your life and assist you to understand why "stuff" happens inside our lives we can't appear to grasp. My tips is always to read it with an open up mind, take what you would like and leave the rest. Respect those that seek the Truth, doubt those who think it is. I'm so pleased I finally browse it and I'm looking towards reading more

of his books.. Wow...This is relayed as fact. Like many earlier review writers, I gave up on this publication when I came to the Dolphin chapter: dolphins are dying because they are exhausted and have decided collectively through their group consciousness to abandon the planet earth. I am open minded, but am especially troubled when I run into writers who, rather than state issues as "as i view it", or "in my own watch", or "what I believe is.. The Seat of the Soul, may be the first spirituality book I read and it fundamentally changed the way I view everything. It explains things I've by no means heard of so it requires a long time to learn. This certainty is normally disturbing, particularly if claiming to know what dolphins believe, or the many planes of angel existence, etc. Most Influential Reserve! Oprah lives and dies by this reserve. I always knew that my thoughts had been powerful, but everything seemed to click inside me when I go through Gary Zukav's explanation on what purpose creates karmic energy that ultimately comes back. I understood I'd need to reread this, always. I made a decision to revisit this publication after having read it years ago.. Extremely insightful. still, the message is a very positive one), Michael Singer, Tosha Silver, Peace Pilgrim, Eckhart Tolle. I get that the most important thing to ask oneself if whether a article writer is asking you to take what they say and judge it on its merits, and then to incorporate it, or not, into your look at of spirituality. If they are insistent and say "this is the way it really is", then probably they are simply requesting to buy to their version of actuality, which is certainly unlikely to be reality at all. Respect those that seek the reality, doubt those who find it. I wanted to go with him.", instead tell us *exactly* how stuff are. Feels like a reference publication you go back and forth. There's a study and exercise guide by the end of the reserve for every chapter.. I'm loving it, but it's taking me quite a while. After reading the book, I tried to create even more responsible choices and look at the consequences of my choices by asking: do I must say i want what this choice will produce? But at the end of the day time, for me, this is troubling materials. She mentions it in every her interviews. It transformed her life and it's really changing my thought process about a large amount of things in lifestyle. "I linked to the concept that every energy I discharge ultimately comes home to me and also have witnessed this play out hundreds of times in my life. Life changing!!! I specifically like Lama Surya Das, Thich Nhat Hanh, Marianne Williamson (although someone else who knows exactly how it is. This time around it had even more meaning. It's as though Zukav was speaking to who I am right now and the higher self I am evolving to be. Life continues on some more. Love, love, love Just read it! Therefore inspiring! it is difficult to articulate. After reading reading the chapter about Karma, I threw the book in the trash." "An intention isn't just a desire. Like religious beliefs it helps to keep you in bondage and provides others power over you. Many negative points are taught to youthful unknowing people, it requires time to find it out. Learning from your mistakes and changing behavior is usually where this idea should end. Author is normally a traitor to awareness. Refreshing and inspirational Loved it , a great listen in audio book . Most have Wonderful awesome read Life Changing This is so well crafted. Flowed very easily and leaves you seeking more.. If you think you'll like this, YOU LIKE IT!!! Read this ASAP I began reading so fast, We couldn't put it straight down. When I realized how precious this was, I slowed down. Life goes south, divorce at 50, change of lifestyle instantly, and lost looking for a path back. Sometimes I head to open the reserve and stop myself. There are several other writers out there who relay their very own sense of spirituality from a more nuanced and less managing perspective. I'm so grateful I found this, therefore grateful. It helped me understand points my intuition was telling me but I didn't understand how I knew. Like I was remembering something I currently knew but experienced forgotten. Life goes on raising family members and functioning, but tried to incorporate the things I learned in this reserve in tack. Great book. Very insightful. It feels so familiar and comfortable. Gary is great at putting all this into words. Lots of healers cite to it as being a foundation piece. Interesting ideas but difficult to understand I actually really wanted to such as this book. But, I came across the chapters to be choppy and several ideas shared (as though they were details) without context. And after reading half of the book, I didn't know how to apply

any of the ideas.
