Great resource! I purchased this for my kids who are in elementary college; you have a 504 strategy and the other has an IEP. The "what's not an accommodation" section was well worth the price of the book. Sometimes fierce self-advocates just need to have an excellent laugh to allow them to recharge their energy. It is educational and fun for parents AND children! This is actually the first source I've noticed that is clearly a perfect fit for youthful kids. Probably Ideal for kids ages 8-12, but can work for ANY age, as the name indicates. It is also a great publication to explain to others exactly what it means to have an lodging. I know that easily experienced funny about needing assistance in learning or working at employment, that this book would be a help to me. A tender primer about what it means and how it feels with an accommodation for your disability Nina G has written a wonderful reserve about accommodations that some people dependence on their disabilities. The illustrations by Mean Dave certainly are a real plus, bringing humor throughout the book. Really helpful!" Simply purchased two! They enjoyed the publication and Mean Dave's illustrations so much which helped with what might have been an awkward or uncomfortable conversation. Dr. Nina G gracefully embraces a subject still taboo in the end these years: advocating and challenging accommodations in the classroom. I'd highly recommend this publication. I loved the enthusiasm of the author and I recommend this publication to a person with school age children are who are normally nervous or shy with regards to individuals who look or audio different. I was looking for guidance on how my daughter could approach and connect to children at her college and this publication provided wonderful insights and anecdotes. You can't help but feel more connected with everyone after reading this book. Great for the classroom! After reading the reserve and performing the workbook exercises my college students have gained a lot more self-confidence and willingness to go over their disabilities and so are ready to face up to the challenges of middle college. I recommend it for teachers, parents and students alike. A wonderful, poignant starter book for those searching for insight or help in navigating these resourceful waters. A+! As a kid therapist AND a mother or father, I say "Yeah! I will get this to part of my curriculum I used this reserve and the online workbook with my 5th grade special education resource class to help them learn to advocate for themselves. This book does a great job explaining a possibly difficult topic to kids, while maintaining humor for parents! A few of my favorite lines "Therefore an accommodation doesn't imply that you get something more, it just enables you to show what you already know or can perform," and "You hardly ever know who may have a disability because many disabilities you can't see. It inspires self-belief and hope." I borrowed somebody else's duplicate, and my very next client (a shy woman who doesn't frequently speak) immediately grabbed the book with pleasure as I discussed the reserve with her mother. I've worked in nonprofit and university configurations on plan and curriculum development to support high school changeover for learners with disabilities. WARNING: There can be one illustration that includes a blind person farting on a bully. I personally find it HYSTERICAL and feel my child clients will like the potty humor. I highly recommend this book to therapists, teachers, and parents! I'm going to be buying more just so I have a few to share with other kids and families. requires the mystery out of disabilities The story of Matt is told in keeping sense language which makes his experience easily identifiable. It's nearly like becoming in a secret club. Matt's tale explains feelings and specifics. In other words, the author will take the mystery out of coping with disabilities. It's all only a part of human being diversity. I love this book. I recommend this book all the time for students who need learning supports in school. It uses accessible vocabulary and not only clarifies the how and just why of getting accommodations in college, but it also does it in a way that helps kids to comprehend that learning disabilities and

learning variations aren't negative or shameful. Amazing Resource! I've used this publication with my own child in assisting him to advocate for himself and it's a favorite in my neurodiversity financing library for parents, teachers and learners.
