Not really, "soothing toner for mixture skin," but "ingredient, component, ingredient, ingredient toner.) or other useful, relevant info., then there are a bunch of recipes, the majority of which do not really make reference to what the resulting item would be best for. Because condition A can be listed initial, does which means that the 1st recipe is wonderful for condition A? In a long term collapse of the electric powered grid, there may be no more cosmetics and remedies - and everyday health items - at your neighborhood grocery store or pharmacy. What then? This book answers the question. But I'm talking about the book generally. Don't ever purchase books on cosmetics for your lady or girlfriend! So just do your personal. While males may think of preps like food, water and ammo, perhaps it takes a female to think of things like replacements for commercially created toothpaste and oral maintenance systems. Think about it: If there are no dentists available and suddenly you or somebody in your family has a dental issue, it's rather a big issue." If the every day health and cosmetics you are used to are no more, there are natural, easy to make and effective alternatives. Things like toothpaste and mouthwash will be crucial for preventing
