Trauma Care for the Worst Case Scenario

[continue reading](#)

NOTE: A NEW ADDITION IS NOW AVAILABLE BENEATH THE TITLE, "TRAUMA LOOK AFTER THE WORST CASE SCENARIO, 2ND EDITION. Also covered are useful exercises. When “period is definitely of the essence” you need to be ready to respond." Trauma Look after the Worst Case Situation by Gunner Morgan covers medical considerations for dealing with serious injury leading to heavy bleeding or an open chest wound which are two leading causes of loss of life from trauma such as gunshot wounds, knife wounds and blast injuries. This reserve is targeted for law enforcement officers, military staff, correctional officers, detention officers, probation & parole officers, preppers among others who want to know very well what medical gear to carry for treating the worst case situation. Topics covered include: Types of crisis medical training, Tactical Combat Casualty Care applied to civilians, Individual First Aid Kit (IFAK) considerations, IFAK components to add a tourniquet, upper body seal, pressure dressing, hemostatic agent, nasopharyngeal airways, and gloves. If you are not prepared for the Worst Case Scenario you are not prepared!

I am telling a few of my buddies that this is a must read. I have read lots of books on first aid/trauma care which is one of the best non textbook books I have found. Yes you are told to get medical assistance, but the more advanced procedures you are seeking to learn are protected more in-depth. Not a medical textbook but still worth buying. Get this Book in case you are Law Enforcement or a Prepper Trauma Care for the Worst Case Situation is a wonderful book on what to carry in your medical package especially relating to severe bleeding and open chestwounds. Very valuable information which makes you really consider issues. Minimum information Minimal information, with a common sense approach. This reserve is really geared toward the most severe case scenario. Also discussed are tactical factors if you are injured but still have an active threat that wants to harm you. This requires a different degree of response than state from an auto incident or a natural disaster. The reserve also describes the mindset one would need to not only survive, but also to be useful when lives could be lost. The publication is well-organized and full of useful and relevant information when coping with very significant and life-threatening accidental injuries. This book is concise and incredibly relevant especially if you work in a dangerous profession or society goes south! If you work in law enforcement, the military, or you are a prepper after that this is a must have book in your reference library. One Star Just what a waste of my cash, only links to Amazon products. Not very detailed, just outlined for basic informational purposes. Valuable information. The armed service has shown that rapid capability to stop severe bleeding is absolutely crucial and saves lives. Five Stars Great Seller Five Stars Nice reference. Also great recommendations for advancing experience, schooling, and education. Many references to use for further study. Many good starting applications. This book would provide someone who doesn't have an EMS background with a good deal of information without need to attend an EMS .. Differs from General first aid and uses scenarios. As an operating EMT, this publication would provide a person who doesn't have an EMS background with a good deal of information without need to attend an EMS program. By the end of the book are some basic practical exercises that you can use. Outstanding publication! This book goes over items such as tourniquets, pressure dressing, chest seals, etc. Written for laypersons from a professional's point of view. It's free thus maybe you'll learn something for free. Free, just hope we never need the information. Ideal for 1st responders and preparedness minded persons That is great information on techniques and equipment.. An excellent first step This is a really good reference starter book. Great resource on trauma care Great resource about trauma care. and the writer provides specific product recommendations. Short and extremely focused read.
