This so called "e-book" is written so poorly, it is absolutely ridiculous! The bulk of the publication is comprised of needless, outdated illustrations that consider up the majority of the space on each page. Very informative Great book. From name page to the conclusion, there are one hundred pages, nine which comprise the table of contents. The information within this publication includes unsubstantiated statements about the benefits of apple cider vinegar, coconut oil, and almond oil, which may or may not be accurate, as there is nothing to back up the statements produced. The entire contents might have been written a lot more elegantly and with much more effect had it been presented in a five or six page paper, without the photos, and with references to support the information provided."Furthermore, check with your dentist before you take the author's assistance in applying ACV on your tooth as a teeth cleaner.
