NOTICE: Realistic Bug Out Handbag, 2nd Edition: Prepared to Survive is now available. The 2nd edition is significantly revised, comprehensive, and updated at over 600 pages. Realistic Bug Out Handbag by Max Cooper units itself apart from many other comparable books. You cannot believe that in a bug out situation you will be able to use your 4x4 and travel to your bug out area. Too many people solely focus on loading up their handbag before zippers are going to rip apart. Chances are gridlock or other road conditions will render your automobile useless. This book addresses the reality of bug out hand bags. Their bags are as well full and way too heavy to travel by walking. Way too many people have their bug out handbag stored in their home incorrectly believe that they are prepared to bug out...but they are not. Yet, many folks have never stepped outside the comfort of their house and carried their bug out bag on their back. For these unprepared individuals failure is an extremely real reality. Practical Bug Out Bag covers aspects you need to know in order to bug out including a very useful "Bug Out Bag Assessment" which will provide you a good idea of how ready you are to immediately bug out. It really is about your decision making ability to know and understand the cost/benefit ratio of each piece of equipment that you decide to put into your bug out bag. This book is not about lists although some lists are included. You may have to travel on foot and you must have a bug out bag that you can realistically carry. Read Practical Bug Out Bag to discover why you tend to be more than likely not prepared to bug out and how you can remedy your situation. Finding out that you will be not adequately prepared during a bug out event can be a preventable failing...this book may be the prevention! This is an absolute must have reserve for your preparedness reference library.

. I finally decided to buy this one after reading reviews. In search of a guide to help build your first bug away bag? Cooper hits the nail on the head by reinforcing the idea that you may have to bug out on foot for a bunch of reasons. For this reason, not merely must your handbag be light nevertheless, you need to be in condition to walk for an unfamiliar period of time. Too many books focus solely on lists of items to put in your bag without very much insight or concern of other factors. Aspects about this book that I love include: + The focus is on reality rather than theory + Provides excellent tips on how to test thoroughly your capability and conditioning + Discusses different variables that may impact your capability to effectively bug out + Advocates using written goals and a resource (I've yet to find another BOB publication that targets using goals – great idea) + Stresses that food is a necessary element of your bug out bag despite the fact that it is possible to survive up to thirty days without food + Provides a different method of your actual handbag. Many books focus on blending in but Cooper provides another choice. When it found a couple of groups I was undecided about what items were greatest. I have learned that the subject of bug out luggage, preparedness, each day carry, etc. is indeed huge and diverse that one book won't hit on every feasible topic. The same applies to this book. I've been building Bug Out Bags for my entire large family for the past couple of months. Highly recommended! In search of a guide? Not quite satisfied? Lack the confidence in your present bug out bag? Although I am no stranger to this issue of bug out bags I picked up lots of gems in this publication. This is THE Show you want. Lack the confidence? Look no further. Not really quite satisfied with your present bug out bag? Not want .. Contains realistic, rational reasons for items to become included, or excluded. Awesome I love it. Found much more detailed info for free on the Net. You won't find particular lists of stuff designed to just fill up any old bag, thus giving you a false sense of security and self-confidence. Not merely will you learn the thing you need in your bug out bag, become familiar with the correct test methodology to verify your bag provides what you need. And when testing exposes a problem, you will know what you ought to do to make it right. Interesting read. I guess I won't be taking that ... Interesting read. I guess I will not be taking that kitchen sink as I decided. Max can't express it even more obviously, lighten your load. Excellent book. Covered much more information than I experienced .. This book is very "reality" based which cannot be overlooked especially if you ever need to bug from foot. Excellent book. Covered much more details than I had anticipated. Strongly suggested for anyone setting up their very own bug out bag. Good book Great to remain prepared, good insightful reserve that people all should go through and learn from. Five Stars great book very realistic Very Disappointed.. Took only an hour to examine. Max can help you make the proper decisions to build the bag that will support your needs in your unique situation and environment. I almost feel awful about giving this one star, however, not as awful as I do about the money I wasted. But, if you are searching for a really realistic view of bugging out this book is your resource. This has been a very time consuming and expensive project.. + Has a 21 question bug out assessment to keep you focused on your skills and needs + Filled with valuable nuggets of info that you may not have previously thought about + Discusses the realities of bugging out with kids and the elderly + Offers a set of resources + Good usage of photos Overall Assessment: Realistic Bug Out Handbag by Max Cooper is one of the greatest bug out books that I actually have read on the topic and I've read a lot. So I looked for an extremely rated book on this subject. There are a flood of books on the topic with many being very short in length, quality, and insight. I was truly disappointed. Extremely basic information. Read whole book in only over an hour. Do not buy. I needed suggestions with reasons as to

the reasons one choice will be much better than another, but rather got that which was basically a list of items that can be bought for each category. I currently knew what the purchase options were.. Four Stars It is minimal.I wanted to know which ones were best and why, but that details was not given for me. I found the pages about drinking water purification especially lacking in information and choices. Save your money and spend a couple of hours reading some of the many sites available for free online. An extremely nice reference supply for putting together a Bug Out Handbag that is functional. Sad to say this book really offered me nothing at all in the form of advice or useful info. Five Stars Great Book!!!! A very nice reference supply for putting together a Bug Out Bag . Simplistic, uninformative reserve. I've have read sites and product critiques about BOB bags to educate myself about the best way to put together the BOBs. Also browse the reviews for the products you are considering for your BOB because they will offer many insights into what works and why.. Great practical tips I have several books on bug out hand bags and this you have great practical tips and concepts that I am buying into! 4 stars but really could be 5.. need. Four Stars OK book and no useful information arrived of it Sorry, I was under the impression that this would give me personally more information, however the writer repeats itself again and again, no useful information arrived of it..Actuality Based Bug Out Book Realistic Bug Out Bag by Max Cooper is definitely one of the better bug away bagbooks available. Could have suit contents in a large pamphlet. Max has written a gem with this one..
