The way I chose to utilize this book was more as an instructor's manual. Unique note for fellow instructors: The instructor PowerPoints can be acquired through the publisher and are very sparse!! Saved me \$50 and for a broke scholar that's a lot of money. Bought this book used for among my classes and it had been perfect! An incredible purchase! Thank you! However, with each and every assignment, my college students demonstrated solid comprehension of the ideas!! I discovered this book, "Public Psychology of Dress," last year at a conference when buying brand-new textbook for my Public/Psychology of Dress course. I utilized "The Meanings of Gown" together with this textbook for supplemental reading purposes as this particular source is usually a compilation of numerous content that address the ideas of outfit theory. Saved me \$50! This publication both provides and assists spark ideas for application of the concepts and increased student engagement. I wanted to implement more dress theory into the course I educate for undergraduate freshman and sophomore outfits students. Most amazing was the outcomes of the ultimate project/display of my students where I required them to apply their semester learning of dress theory.'s book is a great source for outfit and behavior! I was impressed by the amount of theory in the chapters. The chapter on analysis was also very beneficial for my learners; I received plenty of positive responses from my students stating just how much their eyes were opened up to the many approaches to research. One of my favorite areas of this book is the inclusion of exercises and actions. I could adapt and implement these during class intervals for students to use the theoretical ideas and research methods. I could not end up being any happier with the outcome of by using this textbook! My preliminary concern in by using this textbook was that my college students would feel overwhelmed by all of the gown theory in this text message. Superb source for teaching social/psych in dress! Lennon et al. Various other exercises and activities I used for out-of-class assignments in conjunction with initial assignments I created.! I spent a lot of time creating lecture slides and instructor notes. If you don't have fingers like lightning, I strongly encourage you to purchase a Scanmarker to quickness this process up!
