A Groundbreaking Exposé to the HPV Vaccine and the Technology, Safety, and Business Behind It Cancer strikes fear in people's hearts around globe. Therefore the appearance of a vaccine to prevent cancer—once we are assured the human papillomavirus (HPV) vaccine will—seemed like a game-changer. Since 2006, over eighty countries have authorized the vaccine, with glowing endorsements from the globe's foremost medical authorities. \$5 billion in annual sales, the HPV vaccine is a pharmaceutical juggernaut. Yet scandal now engulfs it world-wide. The HPV Vaccine on Trial is certainly a shocking tale, chronicling the global initiatives to sell and compel this alleged miracle. The reserve opens with the vaccine's invention, winds through its regulatory labyrinths, information the crushing denial and dismissal of reported harms and deaths, and uncovers the tremendous profits pharma and inventors have reaped. Written in ordinary language, the reserve is for everybody concerned — parents, sufferers, doctors, nurses, scientists, healthcare organizations, authorities officials, and schools. Bringing in over \$2. Ultimately, this book is not just about the HPV vaccine, but about how exactly industry, government, and medical authorities may be putting the globe's children in harm's method. The authors have written an unprecedented exposé concerning this vaunted vaccine. Authors Holland, Mack Rosenberg, and Iorio drill down into the medical trial data, authorities approvals, marketing, and personal accounts of egregious injuries that have implemented in countries as far-flung as Japan, Australia, Colombia, India, Ireland, the U. and Denmark.

WOULD YOU TRUST A DISHONEST VACCINE COMPANY TOGETHER WITH YOUR CHILD'S LIFE? Read Chapter 8. Eyesight opening. Guess what? IF YOU'RE NOT UTILIZING THE REAL VACCINE IN YOUR SAFETY TRIAL, YOUR Protection TRIAL Is normally FRAUDULENT. I believe it is also fraudulent to call a highly reactive substance a "placebo," just like the aluminium adjuvant used in almost all the protection trials.. Every one must read this book that's loaded with horrific details that the general public doesn't know. Thank God the authors thought to look at the real data. At least, not if you're being honest. But Merck did. And The HPV Vaccine On Trial Publication provides absolutely irrefutable proof. In addition they show that at least one population of trial subjects (pre-teen and teenage girls, believe it or not) was lied to, and told that they might receive either the vaccine or a saline placebo. If we consider this as just kid's and their parent's issue, then we better awaken quickly, because this sort of Big-Pharma tack ticks are almost everywhere... Just like we approved their word that birth control pills were safe, and Vioxx, and statins. Wow! Exceptional investigation of the real trials, and the real results. Holland, Ms. and Every main languages! For humanity's sake, we need to stage it up. Parents have the proper to know what is being injected into their kid and the risks connected with each medical treatment. something that was NOT a placebo. AND OPIOIDS. It is the same fricken matter each time -- they lie, but dangle something we want -- like pain relief, or protection from tumor -- and we simply accept it. Well, no more. THAT MEANS YOU CAN'T USE IT AS A PLACEBO IN A Basic safety STUDY.. Children's lives had been RUINED by this vaccine. Read the book. Every parent, every grandparent, every medical expert, and every legislator should read this book. I used this reserve for my testimony to oppose guidelines which will require all children to receive HPV vaccine for school access in Hawaii. CDC should be on trial with Merck This book reveals everything that is wrong with how pharmaceuticals and biologics are tested and approved and promoted by industry and the government. As a practicing doctor, I've treated greater than a dozen girls harmed by the HPV vaccine and also have seen first hand the dangers of the vaccine. Manipulative data entry to disguise that lower amounts of adjuvant had been administered during basic safety trials to attempt to minimize reactions? Severe fresh autoimmune reactions dismissed as unrelated to the trial vaccine or AAHS? The CDC collecting royalties on the sale of every one HPV vaccine and refusing release a how much they make? And today, even in the face of this book's revelations, and Cochrane disintegrating over their industry-biased HPV vaccine evaluate in which not really a solitary trial with saline placebos was included, and the vaccine being reported to VAERS for even more adverse reactions than any various other vaccine, and even understanding that trials uncovered vaccination after a prior infection INCREASES threat of cervical lesions? So beneficial. Our children deserve better. Sadly, many doctors do not provide genuine educated consent. today the FDA authorized it for make use of in 27-49 calendar year olds? No. This assault, this handing over of the populace to drug businesses as both test topics and cash machines must end. Jaw dropping information everywhere! Read this initial. I am so grateful to Ms. Interesting insight. You will stop questioning whether to get this vaccine. You will know what the trials appeared as if, the questionable benefits, and you may have a clear understanding of the dangers and side effects. Buy a duplicate for your physician, too. The vaccine manufacturers are not going to share these details with them, although they should. Merck evidently SWITCHED OUT the vaccine in one of their test organizations for a weaker vaccine, with half the amount of aluminum adjuvant -- 125 mcg, that is actually just ONE-FOURTH of the adjuvant found in the current Gardasil 9. For humanity's sake, we have to step it up. No matter what you believe about HPV or vaccines in general, the book is endorsed by

leading scientists and medical professionals who were consulted before completing the publication, including Nobel Laureate (for discovering HIV), Dr. Luc Montaignier. Dr. Montaignier starts the preface with (I paraphrase here): "This reserve regrettably isn't fiction". Every parent, high school or scholar can benefit from the vital information featured in this book I cannot put down. Iorio for writing this timely book. Buy a duplicate, read it, talk about it. Buy another copy. Leave it at your doctor's office. We are in awe of Eileen Iorio, Mary Holland, and Kim Mack Rosenberg for getting the courage, and the tenacity to comb through so much research, gather assets and connections to put together this stellar reserve, which might forever change the way we appearance at vaccines. At least may it be the catalyst to put a stop to the massive damage this specific vaccine is allowed to cause in way too many girls, boys and adults. Must go through for parents and pediatricians! Every parent and pediatrician should read this reserve! . However if you would like facts you'll find them in short supply. What We Haven't Been Told A complete page turner! Just what a corrupt market. If this reserve is browse by the moms on earth, the HPV vaccine will suffer a swift and well deserved death. Bravo to the brave families, doctors, scientists, journalists, lawyers, etc., ready to sacrifice their reputations and livelihoods operating to us all. Must read! Subjects lied to and informed they were given saline placebo when they were given AAHS? If you are considering giving the youngster an HPV vaccine, you should really read this publication first to be really informed. .All of this time, we've simply been accepting the manufacturer's word for this that their item is safe and effective. This reserve provides solid factual info to greatly help parents make an improved decision for his or her child. . We must do our homework and research vaccines. Great fiction read. I'm blown away that dangerous vaccine is in the marketplace. If you think the technology on vaccines is settled, prepare to become unsettled. I am not just one to blindly trust my doctor because let's face it, I understand my kids most effective. When he tried pressing this on my healthful preteen whom I stopped vaccinating years back due to health issues, I wanted to get as much info as you possibly can about this vaccine. A generation done a disservice by way of a shoddy antivaccine polemic In 2006, the 1st HPV vaccine (Gardasil) was licensed for use. Simply know the complete story before buying in to the "one less" commercials. Since about 99. An important read for anyone who is considering this vaccine The authors of the book have presented compelling proof why this vaccine isn't just ineffective, but potentially harmful. FDA & The aluminium adjuvant is designed to Trigger an immune response! It's so well crafted and the last 25+ pages are all citations! Worth reading first in case you are considering presenting your child this vaccine An accurate review of the controversial nature of the safety study and science in back of this vaccine. This publication helps. This was a great read if you are searching for fiction and fantasy! The authors did their analysis to provide you with all the facts. And some had terrible reactions to it, but their reactions weren't reported therefore, because they "only" got a placebo. so well written complex subject matter into easy-examine! and unbelievable truth shipped like SiFi! This is soooooo important to everybody to read. I came across this publication through the YouTube channel "The High Wire", where in fact the investigational journalist of vaccines had been so impressed with a lot more findings in this book. I thought I knew a lot by following "Vaxxed" channel, but Oh, My! this book offered me more big and clear photos of what is going on! Taking into consideration the HPV? This reserve made me more vigorous in supporting the HPV-victim organizations in Japan, and vocal about any of it. Then the ladies in the placebo group got . Most of us can learn from this, and observe how Big-Pharma, federal agency is already bought out, and we had been modern-day-slaves to become milked out our money

for their earnings by obtaining fed crappy foods, get sicken and spend all of those other money. Guess what?. which we worked very hard for.I hope Merck gets sued, and the FDA who approved Gardasil regardless of manipulated safety studies, and the CDC who recommended this horrible vaccine.. Since then, 120 countries like the U. Deep appreciation and respects for the authors for piecing together such plenty of scientific details from all over the world, and writing this. make sure you translate this book into Japanese! Rosenberg, and Ms.! A must read Read this book first in case you are even thinking of getting a HPV vaccine for yourself or your children. I'm so angry that doctors are recommending this and destroying the lives of our teenagers and preteens. This book covers it all, and so much more than I anticipated. on all of the chemicals to get even sicker.S. have adopted it, with marked success reported in decreasing the prevalence of HPV (human papillomavirus), which is implicated in the development of several cancers, including those of the cervix, anus, mouth area and throat. In the U.S., despite limited uptake of the vaccine, HPV prevalence offers been more than cut in two, with a markedly greater reduction in the age group group getting the vaccine. In Australia where most adolescent children have obtained the HPV vaccine, the decrease in HPV infection is a lot more profound - with the prevalence price among 18 to 24-year old ladies declining from about 23% to 1% from 2005 to 2015. Essential read.99% of cervical cancers are caused by HPV, it's anticipated that Australia could in coming years be the first nation to essentially eliminate this cancer entirely. That is great news - however, not for antivaccine advocates.
