

HOW REFUSING TO FACE THE FACTS ABOUT
OUR AUTISM EPIDEMIC HURTS CHILDREN,
FAMILIES—AND OUR FUTURE

DENIAL

A large flock of birds is flying away from a tree, symbolizing denial. The tree is a large, leafless tree with a thick trunk and many bare branches. The birds are flying in a large, dense group, moving away from the tree and towards the top right of the frame. The background is a blue sky with white clouds. The ground is a mix of green grass and red soil.

Denial: How Refusing to Face the Facts about Our Autism Epidemic Hurts Children, Families, and Our Future

[continue reading](#)

Using ground-breaking study, the authors definitively debunk best-selling claims that autism is definitely nothing brand-new. The question is stark: Is autism ancient, a genetic variation that needs acceptance and celebration? Or is it new and disabling, set off by something in the surroundings that's damaging more children each day? Authors Tag Blaxill and Dan Olmsted believe autism is new, that the true rate is rising dramatically, and that those affected are injured and disabled, not merely "neurodiverse." They call the refusal to acknowledge this reality Autism Epidemic Denial, and, most threateningly, liability because of this man-made epidemic. "People who deny that autism is usually new have got self-interested motives, such as ending research that might pinpoint responsibility. The key to stopping the epidemic, they say, is to stop lying about its history and begin asking "who profits? This epidemic denial blocks the urgent have to confront and prevent the epidemic and endangers our children, our country, and our potential. Even as the autism rate soars and the cost to your nation climbs well into the billions, a dangerous new idea is taking hold: There simply is no autism epidemic, and nothing to be worried about.

No Denying This is actually the Book to determine Thoughtful Change I will be up front and claim that I know there is an epidemic yet this reserve brings all the facts together to understand how and why it really is so. I am a contributing writer for Age of Autism and also have the privilege of posting articles over the years with both Tag and Dan. I am also the parent to a severely affected, adult girl, plus I have already been in neuro-scientific special education since 1984. We, educators have been eyewitnesses to these drastic adjustments in medical, social-emotional well-getting, and learning capabilities of a lot more students every year. Autism is the huge iceberg that grows, and the historical and current study in this book are the red flares to acknowledge it.. There's been an explosive tsunami of difficulties for the students, the families, the institution districts, and now adult providers are in danger. Incredibly solid case.. One stage that deserves even more emphasis can be that things haven't slowed down at all -- prices of autism have been doubling roughly every 6 years and so are still increasing; I am interviewing the Author Mark Blaxill February 12th on FreedmizerRadio. To state that what they will have is a new normal is a travesty. Nothing Regular About Severe Autism I have 3 daughters with whole blown autism - and there is nothing "normal" about their lives at 16, 21 and 22 years. They live a sheltered lifestyle with regular care, day programming, special education and assistance with all skills of daily living. The same poisons trigger a lot more than autism:our kids are very sick and things get worse every year. I work with Mark Blaxill and worked w the past due Dan Olmsted within the autism epidemic. we realize that paternal age modifies autism rate, and as fathers age autism rate has increased a tiny amount. Of course - but someday we will DIE and the world will not be ready prepared or financially in a position to care for my girls. Five Stars Comprehensive evidence based research that clearly disproves the non-sense that the autism epidemic isn't real. School districts are crumbling beneath the crushing weight of kids on IEPs.. A well researched review an in depth review of the origins of autism in the twentieth century. Imagine contacting Alzheimer's a late life benefit? Astounding. READ THIS Reserve and form your own opinion - I'm biased by virtue of my own children and my romantic relationship to the authors. Kim Answers a lot of questions about the origins of autism Unquestionably fascinating book and incredibly well referenced.. Good thing cavemen didn't have pediatricians or maybe there would be vast amounts of autistic children posing for cave paintings!The authors also execute a good job of exceeding the original definition of autism and the changes over time. Astounding. Learn the reality from deep dive research right here. Recognition that something about contemporary development has affected the advancement of children needs to occur instead of denial and support of the declare that we are just recognizing a problem which has always existed.. Detailed and devastating Thoroughly shreds the arguments of the "autism has always been with us" crowd. Now imagine Alzheimer's for 70 years in a able bodied person. Page-turner. I read it twice in a row.Everyone should browse this. "Denial" will make even the doubters wonder what can be done now to modification the future. Self-obvious.The authors dissect opponent's claims, sources and methodology. The opponents are not only incorrect but willfully deceptive in order to serve some type of hidden agenda. The authors express appropriate rage concerning this deception for it comes at the trouble of hundreds of thousands.My god what is happening to humanity. Contact it autism in a few - contact it neurological difference in others - this book cautiously dissects the vast Still left wing conspiracy to normalize human brain damage. Skillfully debunks the idea that people have better analysis and changing classification. A genuine tragic epidemic is at hands!David Schultz, M.D.Montpelier Va The mantra we hear endlessly: "There is absolutely no autism .. Amazing book I find myself so involved with it I don't to put it down. Exactly like their first reserve this is a must read for all badly vaccine trained doctors (that is virtually all of these)." Truth: the autism epidemic is quite real and we have to be doing the equivalent of a Manhattan Project to get answers. Solving this crisis is certainly unlike some corporate interests. Money over people. This publication destroys the mantra.. Don't shy from the truth. Well researched background of emergence of autism symptoms The authors of Denial include a thorough overview of medical case studies dating back again to the 1800s and earlier as evidence that the symptom set isn't something that has been present. Kid psychological problems other than more apparent mental deficiencies that included physical differences were uncommon before the Industrial Age. There is absolutely no sharp upsurge in the rate of autism anywhere in the world. We cannot start to change a issue until we admit it is present. I go through it twice in a . This religious tract is crammed full of conspiracy ravings This religious tract claims, falsely, that autism in a "crisis" and that the rate of autism in america has increased--- yet none of the world's experts agree with

the cultist's assertions that the increase is notable, let alone significant. All parents should examine this, it's a required part of the puzzle that should inform your decision about whether to endlessly inject your child or let them thrive minus the dangerous, ineffective vaccines. Do we LOVE AND ADORE our kids? The symptom set similar to that of the autism spectrum just became more common from the 1930s in the USA. CT got a FURLOUGH day the other day denying the disabled their day programs due to budget issues. Amazing book I find myself so into it I don't . Go through it. I was interested to observe that researchers were able to identify very rare conditions in the late 1800s and early 1900s.. the much longer we wait to avoid poisoning our children, the worse it'll get.com from 11am-2pm CST don't miss it. Page-turner. Compelling read. If plan makers do not acknowledge the economic time bomb that's coming because of the autism epidemic then WE ALL will be in a world of hurt. There is absolutely no reason these same researchers could have failed to identify autism. The mantra we hear endlessly: "There is no autism epidemic so there is no need to get the causes. Especially the clueless pediatricians who are dragging a lot more of our children over the cliff into immune and neurological harm with now almost uncountable doses of vaccines. Browse this reserve before uttering another cliched half thought about autism. This isn't better medical diagnosis - it's a genuine CHANGE in how kids function and learn.. We know that autism is usually genetic and epigenetic;
