Knife attacks may appear without warning, and if you are inexperienced and unprepared, you could end up severely harmed, paralyzed or dead. Nevertheless, correctional officers and additional professionals aren't the only ones looking for this training. This course is more than just a book. Dealing with knives and improvised edged weapons is usually a fact of existence for corrections officers, security guards, police officers, campus public security officers and various other security professionals. This course provides detailed step-by-stage photos and descriptions for efficiently dealing with the most typical edged weapon attacks so that you can survive a potentially deadly altercation. Links to videos of the techniques are included right from the book. This teaching can be employed by anyone seeking to learn how to survive an assault with a knife and additional pointed or edged weapons. You can find news tales on an daily basis about someone becoming attacked with a knife. There are videos linked to each technique to be able to watch the techniques being done in addition to the comprehensive created descriptions and professional high quality photographs. The harsh reality is that a lot of people, even specialists, are woefully unprepared for a knife assault and struggling to defend themselves from edged weapons. Concerned citizens need to know how to deal with this lethal threat aswell. The latest random knife attack on the Ohio State campus on November 28, 2016 illustrates this all too well. Learn to protect yourself, your family, your fellow officers and your learners before another knife assault occurs.

Three starts as the beginning pages do involve some relevant info. better off viewing youtube videos Mostly simply photographs of the moves, better away watching youtube videos. Detailed pictures and captions actually enable you to safely figure out how to defend yourself from knife episodes. A fantastic resource for all protection professionals, not just corrections officers. Lots of details on edged weapon attacks from all angles. Save your money Obviously has never worked the job Excellent resource for all safety professionals, not just corrections officers. An essential distinction between this and additional courses designed for guards is that methods in this manual were first tested wearing complete duty gear since that's how they will have to be performed in the field. Furthermore, the course covers dealing with various weather conditions, terrain and additional environmental factors that certainly weigh into your ability to execute a certain move or not. Extremely best for training both fresh officers and existing officers as review materials.
