Paint by Sticker may be the most exciting new idea in activity books, both for grown-ups and kids. The original images are rendered in low-poly, a computer images style using geometric polygon designs to create a 3D effect. Discover the sticker, peel it, and stick it in the right space. No matter who your favorite musicians and performers are, you're sure to be incredibly impressed with this one if you possess an over-all affinity for music as I do. I've never had a page rip while tearing it out. It is very relaxing to basically peel and stick and see a colourful picture emerge before your eyes. And it's fun. I've purchased three so far, and each one is exclusive in its own particular way. I did have to deduct one star because occasionally the stickers are tough to remove as some of the cuts are not complete, evoking the sticker to rip (see attached photo for instance). But I did so find a good solution. The Cher picture makes her appear to be a Medusa, and Dolly Parton's picture is definitely unrecognizable as her, but the others are good. Five Stars Fun if you want busy work. Great activity, but issues with this series...? Having said that, now that various other sticker by number items have come out, that one I had problems with the stickers not really completely having the ability to be removed (so they rip) and there appears to be more space between your stickers that shows no matter how cautious you are. Helps it be a little disappointing with such great photos. Still fun but would like them to repair these issues before buying any additional in series they publish. Music lovers NEED this! I haven't in fact started this publication yet since I literally just purchased it. But I've appeared through it, and I can just tell it will end up being amazing. The stickers are smaller than I expected, which means this appears like something I'll have to be very.... teens which is by far one of their favorite activities..on the subject of. But I think marketing campaign results will be fantastic! Personally I think this is a MUST OWN for music fans such as myself. This publication has great variety with regards to the performers - pop, rock, R&B. Hint: Use an exacto knife or sharp box cutter to remove difficult stickers I really love this particular book series. I highly urge music fans to either a) buy it for yourself or b) add it to your holiday present list. Very enjoyable, with only minor frustrations I have several of the "Color By Sticker" books and I'm really enjoying them. I paint as well, and it's really interesting to observe how effective a block of highlight/shadow can be. My favorites in the publication have already been Madonna and David Bowie. In case you have an exacto knife, or perhaps a sharp box cutter, simply run it lightly across the edges of the problematic stickers, and they will pop right out. Small complaints: 1. There was a little misprint but other than that I am so pleased! 2. Another great tip is to work from the outside in! . It had more than 100 stickers in one section, with the black figures printed on a reasonably dark background. Overall, I recommend this. It's portable, needs no additional items, and there is no prep or cleanup. The book is very sturdy, so you don't need anything hard to press down on (I often do it in my own lap), and the web pages (stickers and images) are perforated, and very easy to remove. Another great sticker reserve, though the original is better The Bowie, Michael Jackson and Prince photos are by far the best ones here. Others are fun because it's stickers, and stickers are relaxing for some people like coloring. Other people take coloring in the lines super seriously, so you might actually get stressed out by something like this. I'm giving it 4 stars because I do like the original publication better when it comes to its quality of images, but I understand folks are probably harder to get "ideal." Dolly Parton and Cher simply look weird in this, though, imo. Beyonce is OK. Disappointing quality If its a sticker book, and the stickers are not cut well so they tear when trying to eliminate from the backing, that's kind of a fail. Why will be the stickers not fitting in the picture? Not really serene or relaxing at all. I don't want to have to use some type of sharp to pull off stickers therefore they don't tear. Upgrade: well, I added a star because its still just about fun. Stickers carry out t all fit I love this reserve of pop icons and have done all the prior books. The only cause I gave it 4 instead of 5 stars is because the stickers aren't all cut to match the spaces and I'm having to improvise by trimming edges etc to fill up the gaps. I've carried out it on other books as well but this was may be the most severe for that. That being said, it's still a fun hobby and book! It's perfect as the individual pages can . This is my second time buying a book out of this brand. I use tweezers to eliminate and place the items. A few of the stickers aren't completely cut, that is pretty frustrating. I love it! I'm 19 and these help me therefore much with my OCD and nervousness. In a couple cases the way the quantities are printed on the sticker sheet they're really hard to read. It offers you a nice backing for each new sticker when you do that. It makes it so much easier and calming on your brain. So a few of the good pointed ones may rip a bit.. On the 1st work two tears from the first eleven stickers. Like this series of books and the themes and content are really fun and interesting. In the end they are usually hidden by various other stickers though. I especially had a issue with this on the Beatles picture.. Needs sticker adjustments.. Appreciate these sticker books! particular. I work with teenagers which is by far among a common activities. It's perfect as the individual pages can either stay

static in the book or it is possible to tear the average person pages out to hand out. You need to be careful never to cut your fingers! Five Stars super fun inside our office - much better than water coolers for sure! Five Stars best thing invented Five Stars My 11 year outdated loves these plus they keep him extremely occupied, particularly when we are on holiday. Five Stars Bought for grandchild who loves it. Very clever. Fun and easy Fun but can be frustrating, a few of the stickers are not fully punched. HIGHLY recommended from me! Makes finishing it useless.
