Very special book for Grandpas memories I can't wait to have my dad fill this reserve out.. A perferct gift to fill out and give to a grandchild. The pages are thinner and kind of boring in terms of design. We actually plan to buy more for each of the grandchildren after the first one is finished therefore each grandchild will better know their grandfather. The queries themselves are good, but besides that, I wasn't as well impressed Memories with love Arrived promptly. I've bought additional memory journals, which one is more of a genuine notebook. This is being completed to give to a grandson. Not that exciting An okay journal. Excellent packaging! Highly recommend! Going to be considered a great keepsake! Five Stars Injoyed filling out this book Awesome I bought this for my boyfriends father for our son that was simply born Dec 15th 2017 he loves it I simply wish it wasn't thus boring looking inside Five Stars Ordered wrong book As he's growing older he isn't informing as many stories on the subject of his childhood and I'd like the grandkids and great grandkids to possess this book forever.. dad in law and both he and my kids loved it! This was something special for my dad in law and both he and my kids loved it! .
