It also finds a code for an audio download that complements the materials in the book. This comprehensive chakra-clearing system can help you fully activate your spiritual capacity to understand and heal! and heal yourself, others, and the planet. freely communicate with God and the angels; In Chakra Clearing, Doreen Virtue guides you through meditations and visualizations to open your chakras, which activates your inborn curing and psychic skills. Enclosed you'll find a code for an audio download that complements the materials in the book. When you eliminate negative energy residues from dread and worry, your natural spiritual power awakens. The audio starts with a morning hours meditation made to begin your day with a bright, positive energy regularly and surround you with curing light. The relaxing night meditation that comes after clears away energy that you may have absorbed during the day, and invites angels to get into your dreams and present you divine communications. This innate power enables you to know the future;

. Thank you This is a MUST for EVERYONE! There is a morning hours meditation and a straight mediation and each are about 25 minutes lengthy. I make an effort to the morning hours mediation/chakra clearing every morning because I utilize a lot of different people and I wish to very clear and empower myself and "step back again and let Spirit lead the way". Whew - what a blessing it's been to obvious and activate and understand that going through my time - the Divine is operating through me - it's decreased my tension level! And, the evening mediation/chakra clearing is one that I try to do as frequently as possible - especially if there were difficult circumstances throughout the day - for this mediation clears and removes the negative areas of the day and creates a peaceful night's sleep. Highly recommend it! Many thanks, Doreen! The Chakra Book you are looking for Love this little reserve. Just perfect for learning about chakras for the very first time and easy ways to clean/align them. I read the book in one seated and that night I visited work meditating. Therefore my life has changed. Have confidence in angels - they are there. I ordered my mother a book the next day. This book is fairly short and simple since it contains the quiz and then has a chapter dedicated to each kind and outlines the characteristics of every. I loved this book! I receive messages that are so effective, the book was all about things I've already experienced. This is actually the first Doreen Virtue book I've browse as I was constantly on the fence on whether she was legit or not. After reading the book, I believe she is very legit. What captivated me was now candid she was about her existence developing up. Until her book, I must say i felt like people with her gifts were just born that way and it's really either "you own it or you do not" and I didn't have "it" as a youngster, so was I just one of the unlucky one's. Arrive to discover through her publication that these "gifts" as we call them are just skills we can find out and practice, like buttoning a shirt, there is really nothing particular about it, you merely need the desire to learn. I highly recommend this publication and I am looking towards reading a lot more of Doreen Virtue's books. Great reserve and is fresh condition as advertised. Overall this reserve is really interesting. CD is worthwhile I have to say that We haven't read the book. I think it is a very positive device in identifying where your body needs clearing and to keep your chakras clear, open, and bright. Spoken such as a true Wise One/ Celebrity Person :) We have to most probably to them and recognize that things that seem like they can't be just a coincidence The angels direct us to messages from the other side. Recommend it!. My mother first got it for me and although I was skeptical of the CD, I decided to pay attention to it one day while driving (my only alone time) and was impressed! I didn't have any expectation going into it, but immediately I noticed myself openly and openly meditating on some chakras, among others I sensed like there is a big "do not enter" register front of that part of my body. I experienced like she was speaking to me. The reserve helps those people who are unsure realize they're not really crazy, just spiritual enough to realize that there are angels to help us if we require their help. There is another book by the same author, of experiences sent in by Women's World magazine visitors, that tells of personal text messages and signs received. Look Up - You Never Know Have you ever taken enough time to look up in the sky to find all the beautiful clouds that form and then watch as they form possible designs? My mother couldn't put the book down. It's a blessing to better understand your purpose once you know your " Soul Group/Tribe". this book tells us how. Whilst driving and needing to have my concentrate on the road, I was able to go through the measures. I took the quiz but right now there wasn't a lot of information about the different kinds of lightworkers therefore i wanted to browse the book and find out more. We just have to most probably to them and realize that things that seem like they can't end up being just a coincidence, aren't! I can't really describe it except it sensed like my own body was stating "no!" This immediately helped me identify the chakras (there have been 2) that need clearing and

starting and the chakras that sensed open and fine. It is possible to stop wasting time trying to find that out and get to work on what we registered to do! If you are really thinking about spirituality and feel creating peace and transformation is usually your purpose in life, then chances are you might be one of the types of lightworkers outlined in this publication. Great Book Great book &, but I am not heavily into this type of work. So for me personally, having done minimal previous chakra cleansing function, I was extremely happily surprised with what I got. I've other chakra books therefore i am familiar with locations on the body and what they represent. I have to browse the book next! You might have read many of them in the My Guardian Angel page of the magazine. They do you know. They form all kinds of items that you have on your mind - If you question 3 people what they see in the same cloud you will get three different answers. When you are worried or feel you need support you look for help and occasionally you can get it in the clouds in the form of angels, animals, or objects. Other instances you can try the ground and find a familiarobject that will assist you. Thank You. The type of Earth angel are you? I ran across this reserve when I saw a quiz online to discover what kind of lightworker you are. I came across the music and voice to end up being calm and soothing, which isn't usually the case with one of these things. I loved it! I read the book through even though I didn't determine with all the numerous descriptions. But I found it very amazing as I read and I attempted to determine who individuals around me might be. Never to long do it is possible to read the details fast, and jump ahead of need be. I also found that when prompted by the CD, stuff or people in my lifestyle would come to my brain that I hadn't previously noticed was a problem for me. So I'd recommend looking at it out and seeing how you experience what it has to say. Book Love the book Would recommend! Love it! Good price Good reading Great book Emerged quickly and was as expected. Inspiring This book is so helpful and informative. You will love reading all but it's cool to work out who you are Very informative great book full of useful information How to heal Nothing new for me. I have to say that I am an intuitive person, open to metaphysical teachings, etc. fun read!
