This 4th edition of the text, Milady's Artwork and Research of Nail Technology, has been thoroughly revised to add the most up-to-date info open to nail technologists and also updated supplementary components for the college student and instructor. The field of nail technology has undergone many changes as new technologies are suffering from and new issues have emerged. Furthermore, this updated text message incorporates recommendations from state boards of cosmetology, classroom instructors, school owners, manufacturers, and practitioners. Their helpful suggestions will make learning easier for college students, simplify teaching for instructors. Drawing on the mixed expertise of 13 sector leaders, educators, and performers, this revised textbook provides learners an intensive understanding of all aspects of nail technology today. Presented in a apparent, user-friendly format that helps students learn the common links between the concepts and principles of nail technology, this text is made to provide college students with the knowledge and skills necessary to pass state licensing exams, in addition to to perform professional nail technology services. This fresh edition will ensure better success for students taking the state table examinations, and offer greater safety for nail salon customers.
