Funny and relatable I bought both of the author's books and simply finished her first a single. It is superb. Reading it really is like speaking with a friend - an interesting friend. The humor is definitely intelligent yet natural, especially therefore because the experiences of the writer are so universal and we can all relate, even a man! Lee shows people the chapters of her "mid-existence" highway in a touching and very humorous style. Potts, MORE - SOON! Everyone in awhile I find a book that considerably exceeds my expectations and becomes an individual favourite. When I was stocking up for reading materials to take on vacation, among the books I picked up was Falling Flesh Just Ahead And Other Symptoms On The Road Towards Midlife by Lee Potts. This is a quick read. Once the wife asks "what's so funny?. It's most likely the funniest publication I've read in the past year or so. You know you're into a good one when you begin laughing out loud during the introduction. Small did I understand how much I would like this book. Lee Potts, a female examining her transfer to "middle age group", wrote this back 1998." by page 2, it's a sure-fire hit. I am a decade older than the author, but found her publication to end up being insightful, wildly funny, and refreshing. Her writing style is laugh-out-noisy funny, and everyone (male OR female) will be able to either relate or understand her observations. Reading her thoughts about her doctor palpitating her breasts during an exam ("This is actually the true definition of getting old, spending a man to feel my breasts") or reliving her attempt to shape up (getting a gap between her thighs, only to find out her butt had sagged and today showed through) had me wishing the reserve would continue for 300 pages rather than the mere 165 it has. Regrettably I can't see that she's created anything else. Too bad, as I'd be lining up to learn it. This can be the first book that both we have read and enjoyed equally.. Without a doubt, the funniest book I've ever read! The only disappointment found in Falling Flesh Ahead is achieving the last page. I did so not want it to get rid of! Lee Potts has evidently remained totally undetected as she lurked in my bedroom, bathroom, and within a lot of my public encounters. I laughed so hard I had tears streaming down my face and my hubby refused to remain in the area with me! She's most likely best compared to somebody like Dave Barry without having to be so outlandish. I go through it at one seated on Sunday evening, and I am still chuckling. What a picker higher! Please, Ms. Thanks This is a complete humor classic! In the style of Dave Barry, true to life, and real funny!! Great Gifts bought these for gifts to provide to people not merely love to read, but will love both the author and the subject. Lee is one of the funniest people I know. It was seated there with a number of other paperbacks, the name looked funny, plus some of the chapters looked amusing upon a quick glance. I'd like to meet that hubby of hers, he sounds very interesting. Browse this! I mean it when I say prepare yourself to laugh! That is an absolute MUST READ and I've already ordered 7 even more to give as presents. The prose is quick witted with frequently interjected "Lee-isms" that anyone can relate too. You will laugh, cry and smile the complete time Get ready to laugh!
