Great book with some fun ideas I bought this book for a friend who was simply celebrating her 40th birthday. Pleasure employing. It's a series of essays by several people on basically how exactly to celebrate life. Occasionally we get too caught up in the everyday activities of existence and we ignore how good it feels to "stretch" by considering another perspective and trying something new or different. While I didn't browse the entire book, just glancing at the desk of contents there have been a few ideas worth pursuing. The 2009 2009 editions usually do not come with Primary. I'd recommend it for anyone looking to transformation up their globe a bit, even if it's not period for a milestone birthday. Yes Very good and funny book Perfect The best gift Five Stars Great gift! I think they should let you know that generally there is a newer edition. Meh Much less humorous, enlightened or creative as I'd hoped. Simply kinda ok. A decent add-on gift for somebody turning 40, but that's about any of it.. Lol Item as expected. Bought this for a friend who says it's a great read! Mmmmmhmmm Idk some of the essays are great but short as well as perhaps u should and return it. Fun Fun read!. I simply noticed there is a more recent edition published in '09 2009. This edition was published in 2007. But I currently placed my purchase and I need it in 2 times (Prime). I am actually ordering another copy just for me - I believed it was that good. The individual I delivered it to is very happy! I simply noticed there exists a newer edition published in . Five Stars perfect party gift Four Stars Good read with good takeaways Great birthday present! Pleasure employing. Item as expected.
