Stalking, AKA seriously deranged individuals This is a crime which has taken on new life and is more and more prevalent throughout society in general. And, don't exacerbate a situation by giving an answer to stalker-like tactics. We've the superstar stalkings, John Lennon, who was assassinated by his stalker, Chapman, Ronald Reagan, a victim of the obsession Hinckley had for Jodi Foster, Rebecca Schafer, the victim of Robert Bardo, Teresa Saldana, victim of a bad Scottish maniac who provides vowed to finish the work when he gets out of prison, then we've the regular folk, who have remained unknown got their paths not really been intercepted by stalkers. Forwards by Gavin de Becker, who write the excellent and potentially existence saving book, the Gift of Fear. Strongly suggested, fascinating read. Plenty of stories Book provides a large amount of stories. And they provide the reasons for the information given. But there's very little guidance given in the publication. Essentially, if a stalker offers you in his sights, the ultimate way to get rid of him is to wish he discovers another victim to focus his attempts upon. Anyone, from small kids, to older adults, can fall prey to these sick people and may not know it for a while. The reason I don't rate thing boy here is because I don't treatment to write a book about it. Nice book but outdated for the digital age I got this reserve for leisure suppose I'd one day become involved with a crazy female (or male) stalker. This reserve is just a little outdated since it doesn't go very much into the high tech stalking of the digital age group, such as Facebook, twitter, IM, GPS, and cell phone problems of today. I would recommend a book that covers those issues more in detail for men and women becoming victimized by stalkers. I still such as this book because it gives overall a very clear big picture idea about how exactly to not become the next victim of a deranged stalker who usually sends blooms to your workplace/house! Very informative I have nothing more to time. Gives one a sense of futility, does it not? Please go through and recommend this book This is a great book. I've read many reviews when it comes to books on stalkers, and several so called experts continue to minimise the worth of this information. be prepared, informed and with the capacity of defending yourself. Make sure you arm yourself with info and read this book. The stalking continuing for over a calendar year with little real help from the local police force and didn't stop until i used the methods in this book. can be an important part of a decision. Generally, most women don't understand that not being clear and concise making use of their wishes because of discomfort levels can lead to even more problems later on. It may be you, your sister, your girl or your neighbor. I was a victim of post relationship stalking after a mentally, emotionally and psychologically abusive relationship ended. Something Everyone Should Know This book has a lot of useful information, and is good to have even though you are not being stalked. There is another book that would work very well with this, that retains things a bit more up to date - Stalking the Stalker. It can help you see how the stalker thinks, and how exactly to protect yourself, your family, co-workers and friends. Please go through and share information about this important reserve. This book should also be browse with The Gift of Dread by Gavin deBecker. I highly recommend it in the process of keeping yourself as well as your loved ones safe! I think that certain should produce their decisions according to their situation, but being conscious of feasible repercussions from things such as restraining orders, etc. I've read about 10 different publications but the most informative were this reserve "Surviving a Stalker" and prevent Indications by Lynn Fairweather. This book is an excellent tool I would highly recommend this book since it certainly outlines the dynamics involved in stalking cases and the way the individual victim could be proactive in their own safety. Every female of each age group should read this publication. As a Professional counsellor who handles many cases of stalking and interpersonal violence I have browse these same books and discover them useful, as perform

many of my customers in assisting along the way of healing after the event and safety before it occurs. Any book on stalking and protection of violence that is included with Gavin Debeckers seal of approval is certainly a must read for me which is no exception. Five Stars A must read.
