Waiting for an Army to Die: The Tragedy of Agent Orange

[continue reading](#)

"I died in Vietnam, but I didn't even know it," said a Vietnam vet in the Today Show one morning hours in 1978, shocking audiences in the united states.the day that the US began spraying Agent Orange on Vietnam—the first book ever written on the consequences of Agent Orange—tells this young vet's Agent Orange Time, to commemorate all its residents who were suffering from the deadly chemical. "Got anyone predicted that millions of human beings subjected to Agent Orange/dioxin would obtain sick and die," scholar Fred A. Through the war, the united states sprayed an estimated 12 million gallons of Agent Orange on Vietnam, in order to defoliate close to 5 million acres of its property. Wilcox writes in the new launch to his seminal book, "their warnings would have been dismissed as sci-fi fantasy or apocalyptic non-sense." Informed in a gripping and compassionate narrative design that travels from the war in Vietnam to the battle in the home, and through portraits of many of the affected survivors, their families, and the doctors and scientists whose clinical encounter and research offered the lie to the government whitewash, Looking forward to an Army to Die tells a tale that, thirty years later on, continues to create new twists and turns for Americans still looking forward to justice and a genuine account of what occurred to them. Vietnam offers chosen August 10— Looking forward to an Army to Die: The Tragedy of Agent Orange—s tale and that of hundreds of thousands of other former American servicemen. The new second edition of Waiting for an Army to Die will be released upon the 3rd anniversary of this day, honoring all those whose families have experienced, and continue to suffer, out of this tragedy.

Thus many Veterans suffered and died leaving youthful families. My husband continues to be struggling, but is living a good life in 76 yrs. He survived stage IV non Hodgkin lymphoma. He's covered from ears to toes with ulcerative eczema and has had nasty skin eruptions each and every time he loses fat. He was subjected to agent orange in 1967-68. He was by no means directly sprayed nor acquired to drink contaminated drinking water. Our two daughters, one conceived direct off the plane, have multiple immune system disorders as perform their daughters. Our boy, born before Vietnam, and his children have non-e. Children of vietnam vets.. Looking forward to an Army to Die: The Tragedy of.. Eye opening Wonderfully written book concerning the side effects our Vietnam veterans and their families have had to have because of Agent Orange. By: Fred A. Wilcox I was involved with the writing of this book; A must read! I helped Fred obtain veterans to end up being interviewed. Many were close friends of mine I was also involved in the Agent Orange Lawsuit filed in the Eastern District of the Condition of New York. One of the first 76 to file with Victor Yannacone in Pachogue, New York. One of the first well crafted books about the terrible effects of Agent Orange If you want more information on Agent Orange or are simply starting you search that is an great reserve..I have survived four AO related tumor surgeries myself since 1986 due to Fred giving me an advance notice on the 22 & 1/2 Million gallons of Dioxins they sprayed on us in Nam.... Sad story is that it is still heading on at the VA and Congress to those that suffer PTSD.(We offered in the Calvary in Nam 1967/68 with the Big Crimson One) Frankly there's just one Trooper in my own unit who made it back to the world who is not seriously ill. Benefits earned but denied. it proves the result of AO on civilian in Nam, Thailand, Cambodia, Korea and on and on. It's getting a bit dated but it cronicles the original struggle Vietnam Veterans acquired with the Veterans Affairs (VA) organization to even acknowledge that the exposure of "Agent Orange".. This book also make one wonders why and what sort of government can treat somebody (willing or unwillingly) who offered their country therefore badly. Great read showing how the VA and Congress conspires in order to avoid providing to those who gave most the very basic health care this business earned..org comes with an interesting site.. Opened my eyes Writer Fred Wilcox's extensive research has resulted in this hard striking and shocking indictment of a cover up by corporations, our army, and authorities-- specifically the Veterans Administration. was extremely Toxic to thousands of veterans. Not until the last two decades, when I became aware of fellow veterans struggling with the Veterans Administration for treatment, and when close friends started dying from unusual cancers, did I become aware of the scope of damage done by the usage of Agent Orange in Southeast Asia. A good book to provide an accurate account of the street blocks help with by the US Government to deny veterans of earned benefits. GOVERNMENT AND CORPORATIONS Wish US TO FADE Extremely informative for something discussed a neglected band of all of us who served their nation and died but are just waiting for death. Sad truth approximately the VA system in the us Regrettably, this is a tale near and dear if you ask me... Provide a better knowledge of the law suits of veterans against those big chemical companies.. He said it was eye-opening and well crafted.Fred only released his second book some time ago, This one can make you pule.Fred Wilcox provides opened my eyes to the scope of this tragedy, which continues to unfold today... Provide a better understanding of the law suits of veterans against those . I've been hearing a lot of the truth from my husband, but I'm learning a lot more from this book. Luckily, his children did not suffer loss of limbs and additional birth defects some of his fellow soldiers' kids do. It's a wake-up demand our leaders who determine the fate of our enlisted men and women who so valiantly serve. Truth Haven't completed it by yet. I've been hearing most of the truth from my . It put a large number of us Veterands Advocates onto the lies being told us

by the Government.. My brother is a Vietnam Veterinarian who had to consistently and repeatedly fight for benefits he deserved and was denied after he developed Agent Orange Lymphoma and could no longer are a plumber as he previously for since he was 14 yrs . old.. the first edition. A Sobering Look Back Bought this for my Dad who loves military history. In addition, it raise a crimson flag on whether the government and the various big companies is doing enough check on all of the various chemicals used in our daily lives. Vietnam A painful book to read, but should be required reading for all members of congress and VA officials. I recieved a nice copy of ths great book I recieved a nice copy of ths great reserve..As a Vietnam veteran, I frequently flew in and out of areas treated by vegetation killing chemicals. Because of their efforts, the VA system identifies many illnesses and will provide treatment and treatment for all those exposed to the substance while in Vietnam. Four Stars so mad that this has happened to a lot of people including our family!
