I needed this... In SEP I left my job of 27 years which was by the end of a forty or so year career in IT. Much of that was unpleasant, long, rewarding and challenging, but by no means true to my primary interests; I simply happened to be good at IT. Richard Leider provides put together a simple publication with some manageable actions to re-start your life, doing what you actually enjoy.org website that is no longer obtainable. I ordered this last the other day and it's helped me focus more than any various other approach over the past three months. Reading "Lifestyle Reimagined" is similar to having a good thoughtful person listening to you and getting supportive of your passions, you should do something important and enjoyable for you personally in the time you have remaining. If that's your look then just go to the website and skip the book altogether, although in line with the book I'm uncertain how much worth the web site offers. They call pension a fresh start instead of an end.by Leider and Webber is a disappointment. The chapters cover the right topics: the pros and downsides of aging, finding your true passion, re-imagining your daily life, and checking out new possibilities. And the authors have a good overall arrange for doing this work - stay curious, reflect, connect to others, expore, and then experiment with some new things. However the content material is handled in a very superficial way. Even the interviews with people about how exactly they re-imagined their lives are completed in a superficial method - as though the interviews were executed through a couple of short emails. The results, I'm sorry to state, are rather insipid.The topics in this book are essential and deserve more serious treatment. I should have browse the reviews upon this book before I purchased. Aging since a Spiritual Practice: A Contemplative Help to Growing Older and Wiser by Lewis Richmond and Travels with Epicurus: A Journey to a Greek Island in Search of a Fulfilled Existence by Daniel Klein are both far better options to consider. Lightweight and Entrance for the Website Nothing new or useful here. Lots of stories about and interviews with others and virtually no exercises that you should put recommendations into practice. Continually identifies the related website, assuming you are entering your fears, hopes and personal programs there. It's thought provoking enough that one would benefit reading it a long time before being Social Security eligible. Interesting read but online tools unavailable. It seems a little bit pretentious (repeating "Existence Reimagined is .. Nothing regarding how to think outside of one's safe place. AMAZING SERVICE. On page 63 I was directed to go to a Life Reimagined site for a "Life Checkup" to greatly help get me began with "Reflection". They don't really really represent older persons or retired folks - they simply want your money, via insurance, etc. So be wary of the constant encouragement to visit "their" web site. It's another method to give the AARP your email address, and get a bunch of junk mail in return. This book challenges people to look at stuff differently. It gets you considering alternatives, and trying them out. The book "Lifestyle by Style" (by Tom Ferry) provides a more rigorous method, and is much more likely to truly get you the outcomes you want, especially if you intend to make a radical modification. THANK YOU. The . It supplied some nice exercises and issues, but nothing very profound. The concept has turned into a movement in some areas, so it may become an intro to even more extensive support and involvement. This is a good intro to how to think about transition and how to function through exercises to find out your core values Great Self Help Book This book paints a new picture of retirement. That one caught my interest in the AARP magazine (full disclosure: I am just in my late 30's, but I am an AARP member because my hubby is over 50 and we became a member of). Past books, movies, TV shows and all the media say pension is a period to go off, seafood and wait your time to die.In short, the book does the work if you're a self-starter and need to make a change.It is a mere shelf help reserve. You won't discover

anything earth shattering or existence changing. I understand that sounds very simple. Pablum. Superficial Advice for Ageing Adults Life Reimagined: Discovering YOUR BRAND-NEW Life Possibilities AARP promoted this reserve in its July 2018 newsletter, which was why I purchased the book. The reserve has some extremely entertaining stories mixed in all through the entire book. Once you read through the reserve you will see things differently. This brand-new look will cause you to rethink options, see new factors. The few (very few) simple insights are lost in paragraphs full of empty phrases. Inspirational for someone of any kind of age looking for a change I am currently taking a 9-month leadership program with lots of assigned reading; we had been also charged with acquiring books to learn on our very own. It casts a new light on that time in everyone's lifestyle. This is the first publication I read within my course that truly got me worked up about change in my existence. I found that a lot of of the book offered concrete illustrations and suggestions, and generated enthusiasm for me without trite platitudes (I will say that late chapters seemed to rely a bit more on such platitudes, but most of the book did not; it just drops off a little bit towards the end). Book references AARP site and related tools - website shutdown in 2017. I say don't waste your time/money. The messages and equipment are classic. Strings of cliches and repetitive drivel.' This reserve for me personally was too soft, even more kinda an assessment dream what your daily life was and what it may be.. Initially is normally was endorsed by AARP, and it's really online processes seemed interesting.. I would recommend checking out the book and the web site, no matter your age. Don't waste your money - tools referenced in reserve not available Don't buy. I also went to the Life Reimagined internet site and used many of the assessment equipment, which are user-friendly, useful, and sort of fun, on top of that. No access to tools. If you prefer a more in-depth method of this type of work, I recommend that you try additional books. Supporting website for exercises, tools, and video clips no longer supported This book depends upon the AARP sponsored lifereimagined. For 90 days or so I've been working through the process of trying to figure out what is next by myself, and also dealing with a specialist firm which focuses primarily on getting you back in the work drive. The key calling cards that are instrumental for helping you identify your strengths and problems can only be on the non existent website, that is the main tool which makes the book useful. The complete program calls for visitors to reflect, connect, explore choices, choose options, repack items, and then act. Why they promoted this book within their 2018 newsletter if they had made the decision to drop the assisting the web site in 2017 appears like a significant "senior moment" out of this organization Save your valuable money and do not buy this book Disappointing, shallow, incomplete with non existent website I read the other reviews posted and I must agree the publication is very superficial. Not sure I love the AARP connection, though. Well, the web site closed Sept 2017, in order that chapter was ineffective. In the current issue, July 2018, of AARP Newsletter, AARP the publishers of this book are still pushing it. That is why I bought it plus the fact that it had been supposedly written for people 50-90. Pablum... Five Stars GREAT PRODUCT. OK for Self-Starters THAT REQUIRE to Make a Change The book is basically an activity of exploration and reflection, encouraging you to try different things and observe how they work out. Started reading and discovered it interesting until I got to the "visit the 'life checkup' on the web" part. The website provides been subsumed into AARP & most of there resources are no longer obtainable. Weird. The authors present a new way to at pension. Weak, too idealistic Hi I remain nicely impressed, inspired, by Leider's/ Barb Haggerty's earlier reserve: 'The InVenturers. I came across it fairly fundamental and basic.. Interesting that AARP offers dropped using the older online study/work processes.

That's. Strings of cliches and repetitive drive. It really is a great reserve for all, whether pension is tomorrow or years apart. according with their ad." again and again), but is basically sound. Fast browse with high-level guidance on how to know what matters to you That is a book for folks in a life transition. Five Stars Check out AARP site which is terrific!
