First off, the color theory. She sensibly clarifies how that may not work if you fall in between. She is right, I've experienced consultants label me springtime, winter season and fall. Her suggestions about how to determine the tones and intensities of each colour help narrow down the number that may look best, not only OK. She finishes with a short section on travel which from my own experience is a lot easier utilizing the capsule concept. Gives links to even more photos on instagram - this sort of reference really needs large amount of photos, even more than you could fit in a book which means this is helpful. The most helpful book about finding your best look I've read therefore many books about fashion and choosing your very best colors and this is the best one BY FAR. If you are unsure which wardrobe book will provide you with the very best visual information to the very best lines for your shape, this is actually the best, also above the "Will this make me look fat" traditional by Leah Feldon or "How Not to Look Unwanted fat" by Charla Krupp.

Crash Course in Dressing Well This book is an incredibly comprehensive guide to how to dress for your specific body, coloring, and traits. Another chapter worth the cost of the book just on it's own is how to make minor adjustments either by tailoring or using sleeve rings (she explains those too) or just the method that you tuck things directly into look your best. The book includes a good and very practical chapter on capsule wardrobes, which bumped it from one to three superstars for me. The before and after photos have become instructive. The tone is usually encouraging and inclusive. I enjoyed the older book, but it has a fuller even more updated group of suggestions and recommendations. You can find sections on color seasons, styles to fit your figure, creating a capsule wardrobe, actually hair and makeup suggestions. Third she carries a whole tutorial on scarf and pashmina tying. It's a crash course in how to dress well! She also has sections on closet organizing, shopping, and care and maintenance of the clothing you have. The best chapter is the one explaining step-by-step how to build a capsule closet, to create many new combinations of outfits from what you curenly have. She includes work, leisure and dress up capsules and clarifies how to believe about your true to life needs based on just how much time your home is in each category. Update YOUR LOOK!
