Very little text and very hardly any illustrations and instructions. Do not waste your cash. Loser book Awful It comes mainly because an awkward pamphlet type thing, without real tips. It's very basic, like down to the common sense kinda fundamentals, and I go through it in about 5 minutes. A Major Let Down! Five Stars Learned a whole lot that I did not really know. There weren't any.? Its just a book discussed makeup, not really on how best to apply it or anything near that and I actually found some of the items she reported to be incorrect. One Star There is nothing that is beyond good sense in this book.. This was a Christmas present for my Granddaughter so when she opened it up I could tell how disappointed she was. She read through it in 15 minutes & had currently known most of the tricks before hand!? That is a read book There are no how to pictures an the few pictures in the book dont show anything really I feel like got rip off I never write a review for anything but I must carry out it this time around. I should have read the review before buying. This is simply not even calling a reserve. It came out with 15 web pages and nothing particular not even have an image demonstrate. You could find everything in the web.. Don't waste your money here. With such a fancy cover, I thought it could be filled with pictures and illustrations. NOT ANYTHING LIKE THE TITLE PROMISES This book is a complete disappointment and includes a very deceiving title. I was expecting some actual professional teckniiques, probably some charts on applying eye make-up or blending or coloring advise that would make a specialist difference in your makeup. What you get is not any pictures, and not even any methods. Her best information is don't pick at blemishes, something every mother tells their about to turn teenagers. My doctor is definitely a man in his sixties. When I find out about her she is not a professional at all, simply someone who her close friends stated she was proficient at applying makeup. It would have been great that she wasn't a professional, and perhaps she really is proficient at applying makeup, but then with the title of her book she must have shown a few of her function, and described how to get the result. Even her cover looks like you are going to get some real advice. Just what a let down!.. I wasted my money on this one This book is quite entry level for make up application. First of all, it says one must 'consult your physician or qualified health care professional . Precisely what would he find out about make-up application? I feel like got rip off.Horrible.! This is a 31-page booklet. I'm sorry for seeming probably a little rude, but this will not have even been called how exactly to apply makeup, this author was really deceiving..
